

**PROGRESS 2.0 mattress**  
Fibersan Comfort-Suite Cover

**CORE**

**TECHNICAL INFORMATION**

- 1-Myform Memory Air 2,5 cm
- 2-Myform Memory 3 cm
- 3-Myform Extension 5 zones 8 cm
- 4-Myform Air 4,5 cm

**Mattress contours**  
The mattress core has **special, ergonomic contours** that provide a correct support to each part of the body and allow the **spine to keep its natural position**.

**Air Flow**  
The special contours **improve the mattress ergonomics** as well as facilitate **air flow**, keeping the core dry and fresh.

**Targeted support zones**  
The central layer features **different levels of density** depending on the parts of the body that they have to support.

**PROGRESS 2.0**

**REMOVABLE** cover with full length zip equipped with 6 handles

**Progress 2.0** mattress uses the **cover system**. This solution allows to **customize** the mattress by choosing between **a variety covers** with specific features. In particular, Progress 2.0 can be covered with **Myform** cover, that features a padding **2 cm thicker** than the others, offering an extraordinary comfort.

**INTERNAL STRUCTURE**

The mattress structure is the combination of 4 versions of **Myform Progress**. The summer side is made of breathable **Air**; the central layer is made of **Extension**, that is ergonomic and remains unchanged over time. The winter side is composed of two layers: the first one is made of breathable and heat sensitive **Memory Air** with **open cells**, that allows constant air flow and provides an even distribution of body weight; the second layer is made of **Memory** with **microcells** that ensure a well-balanced and flexible support.

**7 TARGETED SUPPORT ZONES**  
Profiled foam core that moulds to the body shape
