**MAKE YOUR OWN SPACE HELMET**

**STEP 1**
You will need: a cardboard box, scissors, sticky tape or glue, tin foil, and some bottle tops

**STEP 2**
Tape or cut your box so that it fits your head, but has a gap for you to put it on

**STEP 3**
Draw a circle to mark which area you will cut out, so you can see out of your helmet

**STEP 4**
Carefully cut out the circle using scissors. If you’re struggling, ask an adult to help

**STEP 5**
Once the hole is cut, you can cover your helmet with tin foil by moulding it and using tape or glue

**STEP 6**
Add bottle tops and stickers to decorate your helmet to make it look totally out of this world
