	Since last inspection more appointments had been made available and systems had been put into place to make appointments easier for patients to access
Extended hours opening	
	Yes since last inspection

Timely access to the service

National GP Survey results

Indicator	Practice	CCG average	England average	England comparison
The percentage of respondents to the GP patient survey who were 'Very satisfied' or 'Fairly satisfied' with their GP practices opening hours. (01/01/2017 to 31/03/2017)	71.5%	78.3%	80.0%	Comparable to other practices
The percentage of respondents to the GP patient survey who gave a positive answer to "Generally, how easy is it to get through to someone at your GP surgery on the phone?" (01/01/2017 to 31/03/2017)	25.5%	55.6%	70.9%	Variation (negative)
The percentage of respondents to the GP patient survey who stated that the last time they wanted to see or speak to a GP or nurse from their GP surgery they were able to get an appointment (01/01/2017 to 31/03/2017)	55.9%	70.7%	75.5%	Comparable to other practices
The percentage of respondents to the GP patient survey who responded positively to the overall experience of making an appointment (01/01/2017 to 31/03/2017)	44.6%	64.8%	72.7%	Variation (negative)

Since last inspection two patient satisfaction surveys had been undertaken which indicated an improvement in the ability to book an appointment.

Notes: CQC GP Insight

GP Insight assesses a practice's data against all the other practices in England. We assess relative performance for the majority of indicators using a z-score, a statistical tool which shows the deviation from the England average. It gives us a statistical measurement of a practice's performance in relation to the England average, and measures this in standard deviations. We calculate a z-score for each indicator, thereby highlighting the practices which significantly vary from the England average (in either a positive or negative direction). We consider that z-scores which are +2 or more or -2 or less are at significant levels, warranting further enquiry.

N.B. Not all indicators are part of the GP insight set and those that aren't will not have a variation band.

The following language is used for banding variation:

Significant variation (positive)

- Variation (positive)
- Comparable to other practices
- Variation (negative)
- Significant variation (negative)

Note: for the following indicators the variation bands are different:

- Child Immunisation indicators. These are scored against the World Health Organisation target of 95%.

It is important to note that z-scores are not a judgement in themselves, but will prompt further enquiry, as part of our ongoing monitoring of GP practices.
