

# Care Quality Commission

## Inspection Evidence Table

### Bramham Medical Centre (1-549270599)

Inspection date: 10 July 2018

Date of data download: 17 July 2018

Please note: Any Quality Outcomes Framework (QOF) data relates to 2016/17.

## Safe

### Appropriate and safe use of medicines

Medicines Management	Y/N
Prescriptions (pads and computer prescription paper) were kept securely and monitored.	Y

### Track record on safety and lessons learned and improvements made

Significant events	Y/N
There was a system for recording and acting on significant events	Y
Staff understood how to report incidents both internally and externally	Y
There was evidence of learning and dissemination of information	Y

Example(s) of significant events recorded and actions by the practice;

Event	Specific action taken
Dispensing error when patient was issued more medication than had been prescribed.	The practice had introduced additional checks as part of routine dispensing practice.

### DO NOT DELETE THE NOTES BELOW

#### Notes: CQC GP Insight

GP Insight assesses a practice's data against all the other practices in England. We assess relative performance for the majority of indicators using a z-score, a statistical tool which shows the deviation from the England average. It gives us a statistical measurement of a practice's performance in relation to the England average, and measures this in standard deviations. We calculate a z-score for each indicator, thereby highlighting the practices which significantly vary from the England average (in either a positive or negative direction). We consider that z-scores which are +2 or more or -2 or less are at significant levels, warranting further enquiry.

N.B. Not all indicators are part of the GP insight set and those that aren't will not have a variation band.

The following language is used for banding variation:

- Significant variation (positive)
- Variation (positive)

- Comparable to other practices
- Variation (negative)
- Significant variation (negative)

Note: for the following indicators the variation bands are different:

- Child Immunisation indicators. These are scored against the World Health Organisation target of 95%.

It is important to note that z-scores are not a judgement in themselves, but will prompt further enquiry, as part of our ongoing monitoring of GP practices.

Guidance and Frequently Asked Questions on GP Insight can be found on the following link: <http://www.cqc.org.uk/what-we-do/how-we-use-information/monitoring-gp-practices>

#### Glossary of terms used in the data.

- **COPD:** Chronic Obstructive Pulmonary Disease
- **PHE:** Public Health England
- **QOF:** Quality and Outcomes Framework (see <https://qof.digital.nhs.uk/>).
- **RCP:** Royal College of Physicians.
- **STAR-PU:** Specific Therapeutic Group Age-sex weightings Related Prescribing Units. These weighting allow more accurate and meaningful comparisons within a specific therapeutic group by taking into account the types of people who will be receiving that treatment.( [See NHS Choices for more details](#)).
