

Inspection Evidence Table

Hodge Hill Family Practice

(1-8084307476)

Inspection Date: 18 November 2022

Date of data download: 15/11/2022

Overall rating: Good

Safe

Rating: Good

Safety systems and processes

The practice had clear systems, practices and processes to keep people safe and safeguarded from abuse.

Safeguarding	Y/N/Partial
Safeguarding systems, processes and practices were developed, implemented and communicated to staff.	Yes
Partners and staff were trained to appropriate levels for their role.	Yes
There was active and appropriate engagement in local safeguarding processes.	Yes
The Out of Hours service was informed of relevant safeguarding information.	Yes
There were systems to identify vulnerable patients on record.	Yes
Disclosure and Barring Service (DBS) checks were undertaken where required.	Yes

There were regular discussions between the practice and other health and social care professionals such as health visitors, school nurses, community midwives and social workers to support and protect adults and children at risk of significant harm.	Yes
Explanation of any answers and additional evidence: There is a safeguarding GP lead for adults and children as well as a second deputy lead.	

Recruitment systems	Y/N/Partial
Recruitment checks were carried out in accordance with regulations (including for agency staff and locums).	Yes
Staff vaccination was maintained in line with current UK Health and Security Agency (UKHSA) guidance if relevant to role.	Yes

Safety systems and records	Y/N/Partial
Health and safety risk assessments had been carried out and appropriate actions taken.	Yes
Date of last assessment: November 2022	Yes
There was a fire procedure.	Yes
Date of fire risk assessment: April 2022	Yes
Actions from fire risk assessment were identified and completed.	Yes
Explanation of any answers and additional evidence: Assessments were completed, and any issues recorded and actioned.	

Infection prevention and control

Appropriate standards of cleanliness and hygiene were met.

	Y/N/Partial
Staff had received effective training on infection prevention and control.	Yes
Infection prevention and control audits were carried out.	Yes
Date of last infection prevention and control audit: 25 January 2022	Yes
The practice had acted on any issues identified in infection prevention and control audits.	Yes
The arrangements for managing waste and clinical specimens kept people safe.	Yes
Explanation of any answers and additional evidence: The practice worked with the building owners to ensure latest guidance on infection control were completed.	

Risks to patients

There were adequate systems to assess, monitor and manage risks to patient safety.

	Y/N/Partial
There was an effective approach to managing staff absences and busy periods.	Yes
There was an effective induction system for temporary staff tailored to their role.	Yes
The practice was equipped to respond to medical emergencies (including suspected sepsis) and staff were suitably trained in emergency procedures.	Yes
Receptionists were aware of actions to take if they encountered a deteriorating or acutely unwell patient and had been given guidance on identifying such patients.	Yes
There were enough staff to provide appointments and prevent staff from working excessive hours	Yes

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment.

	Y/N/Partial
Individual care records, including clinical data, were written and managed securely and in line with current guidance and relevant legislation.	Yes
There was a system for processing information relating to new patients including the summarising of new patient notes.	Yes
There were systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.	Yes
Referrals to specialist services were documented, contained the required information and there was a system to monitor delays in referrals.	Yes
There was a documented approach to the management of test results, and this was managed in a timely manner.	Yes
There was appropriate clinical oversight of test results, including when reviewed by non-clinical staff.	Yes

Appropriate and safe use of medicines

The practice had systems for the appropriate and safe use of medicines, including medicines optimisation.

Note: From July 2022, CCGs have been replaced with Sub Integrated Care Board Locations (SICBL) and CCG ODS codes have been retained as part of this.

Indicator	Practice	SICBL average	England	England comparison
Number of antibacterial prescription items prescribed per Specific Therapeutic group Age-sex Related Prescribing Unit (STAR PU) (01/07/2021 to 30/06/2022) (NHSBSA)	0.88	0.82	0.82	No statistical variation
The number of prescription items for co-amoxiclav, cephalosporins and quinolones as a percentage of the total number of prescription items for selected antibacterial drugs (BNF 5.1 sub-set). (01/07/2021 to 30/06/2022) (NHSBSA)	5.4%	7.8%	8.5%	Tending towards variation (positive)
Average daily quantity per item for Nitrofurantoin 50 mg tablets and capsules, Nitrofurantoin 100 mg m/r capsules, Pivmecillinam 200 mg tablets and Trimethoprim 200 mg tablets prescribed for uncomplicated urinary tract infection (01/01/2022 to 30/06/2022) (NHSBSA)	4.60	5.18	5.31	No statistical variation
Total items prescribed of Pregabalin or Gabapentin per 1,000 patients (01/01/2022 to 30/06/2022) (NHSBSA)	97.4‰	113.6‰	128.0‰	No statistical variation
Average daily quantity of Hypnotics prescribed per Specific Therapeutic group Age-sex Related Prescribing Unit (STAR PU) (01/07/2021 to 30/06/2022) (NHSBSA)	0.86	0.61	0.59	No statistical variation
Number of unique patients prescribed multiple psychotropics per 1,000 patients (01/01/2022 to 30/06/2022) (NHSBSA)	9.2‰	7.8‰	6.8‰	No statistical variation

Note: ‰ means *per 1,000* and it is **not** a percentage.

Medicines management	Y/N/Partial
The practice ensured medicines were stored safely and securely with access restricted to authorised staff.	Yes
Blank prescriptions were kept securely, and their use monitored in line with national guidance.	Yes
Staff had the appropriate authorisations to administer medicines (including Patient Group Directions or Patient Specific Directions).	Yes
The practice could demonstrate the prescribing competence of non-medical prescribers, and there was regular review of their prescribing practice supported by clinical supervision or peer review.	Yes

There was a process for the safe handling of requests for repeat medicines and evidence of effective medicines reviews for patients on repeat medicines. 1	Yes
The practice had a process and clear audit trail for the management of information about changes to a patient's medicines including changes made by other services.	Yes
There was a process for monitoring patients' health in relation to the use of medicines including high risk medicines (for example, warfarin, methotrexate and lithium) with appropriate monitoring and clinical review prior to prescribing. 2	Yes
The practice monitored the prescribing of controlled drugs. (For example, investigation of unusual prescribing, quantities, dose, formulations and strength).	Yes
There were arrangements for raising concerns around controlled drugs with the NHS England and Improvement Area Team Controlled Drugs Accountable Officer.	Yes
If the practice had controlled drugs on the premises there were appropriate systems and written procedures for the safe ordering, receipt, storage, administration, balance checks and disposal of these medicines, which were in line with national guidance.	N/A
The practice had taken steps to ensure appropriate antimicrobial use to optimise patient outcomes and reduce the risk of adverse events and antimicrobial resistance.	Yes
For remote or online prescribing there were effective protocols for verifying patient identity.	Yes
The practice held appropriate emergency medicines, risk assessments were in place to determine the range of medicines held, and a system was in place to monitor stock levels and expiry dates.	Yes
There was medical oxygen and a defibrillator on site and systems to ensure these were regularly checked and fit for use.	Yes
Vaccines were appropriately stored, monitored and transported in line with UKHSA guidance to ensure they remained safe and effective.	Yes
<p>Explanation of any answers and additional evidence, including from clinical searches.</p> <p>Blank prescriptions were securely stored and logged to ensure security.</p> <p>There was time set aside for the additional role staff had to be debriefed and supported in their role.</p>	

Track record on safety and lessons learned and improvements made

The practice learned and made improvements when things went wrong.

Significant events	Y/N/Partial
The practice monitored and reviewed safety using information from a variety of sources.	Yes
Staff knew how to identify and report concerns, safety incidents and near misses.	Yes
There was a system for recording and acting on significant events.	Yes
Staff understood how to raise concerns and report incidents both internally and externally.	Yes
There was evidence of learning and dissemination of information.	Yes
Number of events recorded in last 12 months: Five	
Number of events that required action: Five	

Example(s) of significant events recorded and actions by the practice.

Event	Specific action taken
A patient was given the incorrect address for the overflow practice. The reception team found the current address and were able to ensure the patient was seen although late for the appointment	Correct address was distributed to staff to ensure future patients were correctly signposted.
An action was not completed from an advice and guidance letter from secondary care and the change to medication was delayed.	The system was reviewed, and staff went through the process for making changes and following up with relevant clinicians.

Safety alerts	Y/N/Partial
There was a system for recording and acting on safety alerts.	Yes
Staff understood how to deal with alerts.	Yes

Effective

Rating: Good

QOF requirements were modified by NHS England and Improvement for 2020/21 to recognise the need to reprioritise aspects of care which were not directly related to COVID-19. This meant that QOF payments were calculated differently. For inspections carried out from 1 October 2021, our reports will not include QOF indicators. In determining judgements in relation to effective care, we have considered other evidence as set out below.

Effective needs assessment, care and treatment

Patients' needs were assessed, and care and treatment was delivered in line with current legislation, standards and evidence-based guidance supported by clear pathways and tools.

	Y/N/Partial
The practice had systems and processes to keep clinicians up to date with current evidence-based practice.	Yes
Patients' immediate and ongoing needs were fully assessed. This included their clinical needs and their mental and physical wellbeing.	Yes
Patients presenting with symptoms which could indicate serious illness were followed up in a timely and appropriate way.	Yes
We saw no evidence of discrimination when staff made care and treatment decisions.	Yes
Patients' treatment was regularly reviewed and updated.	Yes
There were appropriate referral pathways to make sure that patients' needs were addressed.	Yes
Patients were told when they needed to seek further help and what to do if their condition deteriorated.	Yes
The practice had prioritised care for their most clinically vulnerable patients during the pandemic	Yes
The practice prioritised care for their most clinically vulnerable patients	Yes

Effective care for the practice population

Findings

- The practice used a clinical tool to identify older patients who were living with moderate or severe frailty.
- Those identified received a full assessment of their physical, mental and social needs.
- Health checks, including frailty assessments, were offered to patients over 75 years of age.
- Flu, shingles and pneumonia vaccinations were offered to relevant patients in this age group.
- The practice had systems to inform eligible patients to have the meningitis vaccine, for example before attending university for the first time.
- Patients had access to appropriate health assessments and checks including NHS checks for patients aged 40 to 74. There was appropriate and timely follow-up on the outcome of health assessments and checks where abnormalities or risk factors were identified.
- All patients with a learning disability were offered an annual health check.
- End of life care was delivered in a coordinated way which took into account the needs of those whose circumstances may make them vulnerable.
- The practice had a system for vaccinating patients with an underlying medical condition according to the recommended schedule.
- The practice demonstrated that they had a system to identify people who misused substances.
- The practice assessed and monitored the physical health of people with mental illness, severe mental illness, and personality disorder
- Patients with poor mental health, including dementia, were referred to appropriate services.

Management of people with long term conditions

Findings

- Patients with long-term conditions were offered an effective annual review to check their health and medicines needs were being met. For patients with the most complex needs, the GP worked with other health and care professionals to deliver a coordinated package of care.
- Staff who were responsible for reviews of patients with long-term conditions had received specific training.
- GPs followed up patients who had received treatment in hospital or through out of hours services for an acute exacerbation of asthma.
- The practice could demonstrate how they identified patients with commonly undiagnosed conditions, for example diabetes, chronic obstructive pulmonary disease (COPD), atrial fibrillation and hypertension.
- Adults with newly diagnosed cardio-vascular disease were offered statins.
- Patients with suspected hypertension were offered ambulatory blood pressure monitoring.
- Patients with COPD were offered rescue packs.

Child Immunisation	Numerator	Denominator	Practice	Comparison to WHO target of 95%
The percentage of children aged 1 who have completed a primary course of immunisation for Diphtheria, Tetanus, Polio, Pertussis, Haemophilus influenza type b (Hib), Hepatitis B (Hep B) ((i.e. three doses of DTaP/IPV/Hib/HepB) (01/04/2020 to 31/03/2021))(NHS England and Improvement)	92	102	90.2%	Met 90% minimum
The percentage of children aged 2 who have received their booster immunisation for Pneumococcal infection (i.e. received Pneumococcal booster) (PCV booster) (01/04/2020 to 31/03/2021))(NHS England and Improvement)	64	90	71.1%	Below 80% uptake
The percentage of children aged 2 who have received their immunisation for Haemophilus influenza type b (Hib) and Meningitis C (MenC) (i.e. received Hib/MenC booster) (01/04/2020 to 31/03/2021))(NHS England and Improvement)	64	90	71.1%	Below 80% uptake
The percentage of children aged 2 who have received immunisation for measles, mumps and rubella (one dose of MMR) (01/04/2020 to 31/03/2021))(NHS England and Improvement)	64	90	71.1%	Below 80% uptake
The percentage of children aged 5 who have received immunisation for measles, mumps and rubella (two doses of MMR) (01/04/2020 to 31/03/2021))(NHS England and Improvement)	68	107	63.6%	Below 80% uptake

Note: Please refer to the CQC guidance on Childhood Immunisation data for more information: <https://www.cqc.org.uk/guidance-providers/gps/how-we-monitor-gp-practices>

Any additional evidence or comments
<p>The practice has made a number of changes to try and improve child immunisation targets as below:</p> <ul style="list-style-type: none"> • New arrivals in the UK encouraged to register with practice and also discuss child immunisation as many parents refuse the immunisation due to a lack of understanding • Trying to engage parents from larger south Asian population to bring in children by explaining pros and cons and offering consultations at weekends • Consultation room has a medicines fridge so during a consultation immunisation can be offered rather than having to book a second appointment • Recall system in place with admin team • Practice has a good working relationship with midwives so they are able to send info about new mothers at their first 6-8 week check and encourage child immunisation on the same day, rather than a second appointment.

Cancer Indicators	Practice	SICBL average	England	England comparison
The percentage of persons eligible for cervical cancer screening at a given point in time who were screened adequately within a specified period (within 3.5 years for persons aged 25 to 49, and within 5.5 years for persons aged 50 to 64). (30/06/2022 to 30/06/2022) _(UKHSA)	68.1%	N/A	80.0%	Below 70% uptake
Number of new cancer cases treated (Detection rate: % of which resulted from a two week wait (TWW) referral) (01/04/2020 to 31/03/2021) _(UKHSA)	58.3%	52.9%	55.4%	No statistical variation
Females, 50-70, screened for breast cancer in last 36 months (3 year coverage, %) (01/04/2020 to 31/03/2021) _(UKHSA)	53.3%	52.5%	61.3%	N/A
Persons, 60-74, screened for bowel cancer in last 30 months (2.5 year coverage, %) (01/04/2020 to 31/03/2021) _(UKHSA)	55.0%	55.5%	66.8%	N/A

Any additional evidence or comments
<p>The practice provided the following up to date info as to their current years target levels which their levels were much higher than the targets above. They were also offering smear test clinics at weekends.</p> <p>Patients aged 25-49 year 93.2% of smears had been carried out Patients aged 50-54 year 98% smears carried out</p>

Monitoring care and treatment

The practice had a comprehensive programme of quality improvement activity and routinely reviewed the effectiveness and appropriateness of the care provided.

	Y/N/Partial
Clinicians took part in national and local quality improvement initiatives.	Yes
The practice had a programme of targeted quality improvement and used information about care and treatment to make improvements.	Yes
The practice regularly reviewed unplanned admissions and readmissions and took appropriate action.	Yes

Effective staffing

The practice was able to demonstrate that/ staff had the skills, knowledge and experience to carry out their roles.

	Y/N/Partial
Staff had the skills, knowledge and experience to deliver effective care, support and treatment.	Yes
The practice had a programme of learning and development.	Yes
Staff had protected time for learning and development.	Yes
There was an induction programme for new staff.	Yes
Staff had access to regular appraisals, one to ones, coaching and mentoring, clinical supervision and revalidation. They were supported to meet the requirements of professional revalidation.	Yes
The practice could demonstrate how they assured the competence of staff employed in advanced clinical practice, for example, nurses, paramedics, pharmacists and physician associates.	Yes
There was a clear and appropriate approach for supporting and managing staff when their performance was poor or variable.	Yes
Explanation of any answers and additional evidence: Annual appraisals Induction and shadowing for all new staff	

Coordinating care and treatment

Staff worked together and with other organisations to deliver effective care and treatment.

	Y/N/Partial
Care was delivered and reviewed in a coordinated way when different teams, services or organisations were involved.	Yes
Patients received consistent, coordinated, person-centred care when they moved between services.	Yes
Explanation of any answers and additional evidence:	

Due to and increase demand on family planning the practice made the decision to host a midwife in the practice once a week to improve local access. They work closely with the midwife to follow up care and support to new parents.

There has been an increase in the need for sexual health consultations and due to the difficulty accessing the local centre the practice opened a sexual health clinic with tests and GP support for its patients.

Helping patients to live healthier lives

Staff were consistent and proactive in helping patients to live healthier lives.

	Y/N/Partial
The practice identified patients who may need extra support and directed them to relevant services. This included patients in the last 12 months of their lives, patients at risk of developing a long-term condition and carers.	Yes
Staff encouraged and supported patients to be involved in monitoring and managing their own health.	Yes
Patients had access to appropriate health assessments and checks.	Yes
Staff discussed changes to care or treatment with patients and their carers as necessary.	Yes
The practice supported national priorities and initiatives to improve the population's health, for example, stop smoking campaigns and tackling obesity.	Yes

Consent to care and treatment

The practice always obtained consent to care and treatment in line with legislation and guidance.

	Y/N/Partial
Clinicians understood the requirements of legislation and guidance when considering consent and decision making. We saw that consent was documented.	Yes
Clinicians supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.	Yes
Do Not Attempt Cardio Pulmonary Resuscitation (DNACPR) decisions were made in line with relevant legislation and were appropriate.	Yes

Caring

Rating: Good

Kindness, respect and compassion
Staff treated patients with kindness, respect and compassion. Feedback from patients was positive about the way staff treated people.

	Y/N/Partial
Staff understood and respected the personal, cultural, social and religious needs of patients.	Yes
Staff displayed understanding and a non-judgemental attitude towards patients.	Yes
Patients were given appropriate and timely information to cope emotionally with their care, treatment or condition.	Yes
Explanation of any answers and additional evidence: Two speak up guardians and the Team leaders and PM open door policy.	

Patient feedback	
Source	Feedback
NHS UK	The feedback we saw on the NHS website showed that patients were happy with the receptionists at the practice and while there were areas for improvement were generally happy being able to access a GP.
Compliments	Compliments were shared with staff as a way of improving the practice.

National GP Patient Survey results

Note: From July 2022, CCGs have been replaced with Sub Integrated Care Board Locations (SICBL) and CCG ODS codes have been retained as part of this.

Indicator	Practice	SICBL average	England	England comparison
The percentage of respondents to the GP patient survey who stated that the last time they had a general practice appointment, the healthcare professional was good or very good at listening to them (01/01/2022 to 30/04/2022)	82.5%	80.4%	84.7%	No statistical variation
The percentage of respondents to the GP patient survey who stated that the last time they had a general practice appointment, the healthcare professional was good or very good at treating them with care and concern (01/01/2022 to 30/04/2022)	80.2%	78.5%	83.5%	No statistical variation
The percentage of respondents to the GP patient survey who stated that during their last GP	87.8%	90.5%	93.1%	No statistical variation

appointment they had confidence and trust in the healthcare professional they saw or spoke to (01/01/2022 to 30/04/2022)				
The percentage of respondents to the GP patient survey who responded positively to the overall experience of their GP practice (01/01/2022 to 30/04/2022)	66.9%	65.0%	72.4%	No statistical variation

	Y/N
The practice carries out its own patient survey/patient feedback exercises.	Yes

Any additional evidence
<ul style="list-style-type: none"> The practice monitors the results from NHS survey and uses an action plan to address areas for improvement. We found from PPG that patients were generally satisfied with how they were treated.

Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment.

	Y/N/Partial
Staff communicated with patients in a way that helped them to understand their care, treatment and condition, and any advice given.	Yes
Staff helped patients and their carers find further information and access community and advocacy services.	Yes
<p>Explanation of any answers and additional evidence:</p> <p>Easy read and pictorial materials were available in waiting area, these were available in a selection of languages appropriate to the practice population.</p>	

National GP Patient Survey results

Note: From July 2022, CCGs have been replaced with Sub Integrated Care Board Locations (SICBL) and CCG ODS codes have been retained as part of this.

Indicator	Practice	SICBL average	England	England comparison
The percentage of respondents to the GP patient survey who stated that during their last GP appointment they were involved as much as they wanted to be in decisions about their care and treatment (01/01/2022 to 30/04/2022)	83.1%	86.3%	89.9%	No statistical variation

	Y/N/Partial
Interpretation services were available for patients who did not have English as a first language.	Yes
Patient information leaflets and notices were available in the patient waiting area which told patients how to access support groups and organisations.	Yes
Information leaflets were available in other languages and in easy read format.	Yes
Information about support groups was available on the practice website.	Yes

Carers	Narrative
Percentage and number of carers identified.	The practice had identified 115 patients who were carers which represented approximately 2% of the practice list size.
How the practice supported carers (including young carers).	The practice identified patients with a carer and offered support to them where needed. The practice also had a social prescriber who also supported carers with advice.
How the practice supported recently bereaved patients.	Patients were contacted and signposted to bereavement service which offered counselling.

Privacy and dignity

The practice respected patients' privacy and dignity.

	Y/N/Partial
A private room was available if patients were distressed or wanted to discuss sensitive issues.	Yes
There were arrangements to ensure confidentiality at the reception desk.	Yes

Responsive

Rating: Good

Responding to and meeting people’s needs
The practice organised and delivered services to meet patients’ needs.

	Y/N/Partial
The practice understood the needs of its local population and had developed services in response to those needs.	Yes
The importance of flexibility, informed choice and continuity of care was reflected in the services provided.	Yes
The facilities and premises were appropriate for the services being delivered.	Yes
The practice made reasonable adjustments when patients found it hard to access services.	Yes
There were arrangements in place for people who need translation services.	Yes
The practice complied with the Accessible Information Standard.	Yes

Practice Opening Times	
Day	Time
Opening times:	
Monday	8:00-18:30
Tuesday	8:00-18:30
Wednesday	8:00-18:30
Thursday	8:00-18:30
Friday	8:00-18:30
Appointments available:	
Monday	8:00 – 18:30
Tuesday	8:00 – 18:30
Wednesday	8:00 – 18:30
Thursday	8:00 – 18:30
Friday	8:00 – 18:30

Additional appointment times were made available on evenings throughout the week and weekends to cater for patients who work and children.

Further information about how the practice is responding to the needs of their population

- Patients had a named GP who supported them in whatever setting they lived.
- The practice was responsive to the needs of older patients and offered home visits and urgent appointments for those with enhanced needs and complex medical issues.
- In recognition of the religious and cultural observances of some patients, the GP would respond quickly, often outside of normal working hours, to provide the necessary death certification to enable prompt burial in line with families' wishes when bereavement occurred.
- There was a medicines delivery service for housebound patients.
- The practice liaised regularly with the community services to discuss and manage the needs of patients with complex medical issues.
- The practice nurse worked until 6.00pm over four days a week, and in addition offers appointments in the Extended Access clinic on a Wednesday evening which runs until 8pm and on Saturday 9am-5pm.
- All parents or guardians were able to get a same day appointment.
- The practice now host a PCN Extended Access Hub, and appointments are available every week night across the PCN until 8.00pm, and at the practice on a Saturday 9am-5pm. Appointments are available two weeks in advance and patients have the option to book with a GP, nurse, paramedic, pharmacist, HCA or Social Prescriber. The practice recently secured a pathology sample collection on Saturdays, giving more flexibility for phlebotomy, cervical smears and other tests to take place at a time convenient to patients.
- The practice offers pre-bookable appointments with all clinicians throughout the week, some of which are also available for online booking.
- The practice has a robust register for patients with LD, frailty, end of life, safeguarding needs and trans patients, and they identify patients who maybe homeless or travellers.
- The practice will register any potential patient, regardless of their socio-economic or migrant status. They do not ask for proof of address, ID or confirmation of NHS number to register a patient for general medical services at the practice. They are a RCGP accredited veteran friendly practice – giving priority access to those who have served in the military. They are also a Safe Surgery, and welcome refugees and migrants from other countries to register with them and receive the help they may need. Some trans issues were discussed as part of a joint education afternoon organised by the practice earlier this year, and the practice is leading on the rollout of Pride in Practice training and accreditation for the whole PCN.

Access to the service

People were able to access care and treatment in a timely way.

	Y/N/Partial
Patients had timely access to appointments/treatment and action was taken to minimize the length of time people waited for care, treatment or advice	Yes
The practice offered a range of appointment types to suit different needs (e.g. face to face, telephone, online)	Yes
Patients were able to make appointments in a way which met their needs	Yes
There were systems in place to support patients who face communication barriers to access treatment (including those who might be digitally excluded).	Yes

Patients with most urgent needs had their care and treatment prioritised	Yes
There was information available for patients to support them to understand how to access services (including on websites and telephone messages)	Yes

National GP Patient Survey results

Note: From July 2022, CCGs have been replaced with Sub Integrated Care Board Locations (SICBL) and CCG ODS codes have been retained as part of this.

Indicator	Practice	SICBL average	England	England comparison
The percentage of respondents to the GP patient survey who responded positively to how easy it was to get through to someone at their GP practice on the phone (01/01/2022 to 30/04/2022)	45.5%	N/A	52.7%	No statistical variation
The percentage of respondents to the GP patient survey who responded positively to the overall experience of making an appointment (01/01/2022 to 30/04/2022)	54.0%	47.4%	56.2%	No statistical variation
The percentage of respondents to the GP patient survey who were very satisfied or fairly satisfied with their GP practice appointment times (01/01/2022 to 30/04/2022)	52.8%	47.2%	55.2%	No statistical variation
The percentage of respondents to the GP patient survey who were satisfied with the appointment (or appointments) they were offered (01/01/2022 to 30/04/2022)	79.0%	67.1%	71.9%	No statistical variation

Source	Feedback
For example, NHS Choices	The survey results for the practice showed patients were generally happy with the care and treatment they received. Area identified for improvement were areas on the practice's action plan.

Listening and learning from concerns and complaints

**Complaints were listened and responded to and used to improve the quality of care/
Complaints were not used to improve the quality of care.**

Complaints	
Number of complaints received in the last year.	Seven
Number of complaints we examined.	Seven
Number of complaints we examined that were satisfactorily handled in a timely way.	Seven
Number of complaints referred to the Parliamentary and Health Service Ombudsman.	None

	Y/N/Partial
Information about how to complain was readily available.	Yes
There was evidence that complaints were used to drive continuous improvement.	Yes

Example(s) of learning from complaints.

Complaint	Specific action taken
A patient had complained about the delay in secondary care referral.	The practice ensured the referral had been completed and gave the number for the secondary care team so the patient could keep in touch directly and be aware of the waiting times.

Well-led

Rating: Good

Leadership capacity and capability

There was compassionate, inclusive and effective leadership at all levels.

	Y/N/Partial
Leaders demonstrated that they understood the challenges to quality and sustainability.	Yes
They had identified the actions necessary to address these challenges.	Yes
Staff reported that leaders were visible and approachable.	Yes
There was a leadership development programme, including a succession plan.	Yes

Vision and strategy

The practice had a clear vision and credible strategy to provide high quality sustainable care.

	Y/N/Partial
The vision, values and strategy were developed in collaboration with staff, patients and external partners.	Yes
Staff knew and understood the vision, values and strategy and their role in achieving them.	Yes
Progress against delivery of the strategy was monitored.	Yes
Explanation of any answers and additional evidence: The practice held an away day with all their staff to establish a shared vision. They followed the patients journey through the practice for those with long term conditions and aimed to ensure the experience was as convenient and supportive as possible.	

Culture

The practice had a culture which drove high quality sustainable care.

	Y/N/Partial

The practice worked with stakeholders to build a shared view of challenges and of the needs of the population.	Y
<p>Explanation of any answers and additional evidence:</p> <p>PPG meetings were held every quarter and on average eight members attended. They met in the practice, reviewed compliments, social media and discussed plans and issues. Minutes are taken so those who are unable to attend can get a copy of the content of the meeting.</p> <p>The PPG members also supported with events, for example, the Macmillan cake event and Christmas fayre stall.</p>	

Feedback from Patient Participation Group.

Feedback
We were told that since the practice was taken over by the new provider that services had improved, and patients could now get an appointment and if not a GP would always call back.

Continuous improvement and innovation

There were evidence of systems and processes for learning, continuous improvement and innovation.

	Y/N/Partial
There was a strong focus on continuous learning and improvement.	Yes
Learning was shared effectively and used to make improvements.	Yes

Examples of continuous learning and improvement

- The practice has a pharmacist role in place to free up GP's and have a robust structured medication review system.
- Practice also appointing a prescriber role as part of how they are improving patient care.
- Working closer with sister practice as part of sharing information and improving patient care.
