

RUSSIA DUAL RETURN FUND

LONG ONLY USD DENOMINATED

RUSSIA & CIS EQUITIES

January 2013

Fund Description

Russia Dual Return Ltd is an investment fund registered in the British Virgin Islands. It is a Professional Fund as defined by the Securities and Investment Business Act, 2010 (SIBA).

The investment objective is to achieve capital appreciation in US dollar terms by investing primarily in US dollar-denominated equities of Russian companies (both locally traded and in the form of depositary receipts) and to a lesser extent in companies of CIS countries. The Fund aims to outperform the benchmark index (the RTS Index) in the long term.

The Fund uses a "long only" actively managed strategy, deriving returns from growth and value investing as well as arbitrage and short-term speculative strategies.

Manager Commentary

Russian equities rose further in January helped by the strong ruble, some outflow from Turkish funds in favor of Russia, and advances on global equity markets. We find risk assets overheated at present and are cautious about the outlook for February. We believe that some major Index names (Sberbank, Rosneft, Norilsk Nickel) lack catalysts to grow further from current levels. Approach of the next key date for the US fiscal cliff (March 1) will add nervousness to overheated equity markets.

We sold shares of AFK Sistema, retailer O'Key, and the remainder of our positions in Sberbank and Norilsk Nickel in January. We increased our position in Globaltrans shares during the month.
