RUSSIAN & GLOBAL EQUITIES

September 2017

Fund Description

Russia Dual Return Ltd is an investment fund registered in the British Virgin Islands. It is a Professional Fund as defined by the Securities and Investment Business Act, 2010 (SIBA).

The investment objective is to achieve capital appreciation in US dollar terms by investing primarily in US dollar-denominated equities of Russian companies (both locally traded and in the form of depositary receipts) and to a lesser extent in companies of CIS countries. The Fund aims to outperform the benchmark index (the RTS Index) in the long term.

The Fund uses a "long only" actively managed strategy, deriving returns from growth and value investing as well as arbitrage and short-term speculative strategies.

Manager Commentary

Global stock markets continued their winning streak in September. The Russian market also recovered and tried to resume its positive trend.

The quarterly reporting season will play a role for all financial markets in October. Markets reacted positively to reports by US companies and the Russian reporting season starts at the end of the month.

We still see major risks for global markets and don't expect much from domestic equities. However, speculative trading remains profitable.

We sold shares of Enel Russia in September.
