

RUSSIA DUAL RETURN FUND

LONG ONLY USD DENOMINATED

RUSSIA & CIS EQUITIES

March 2015

Fund Description

Russia Dual Return Ltd is an investment fund registered in the British Virgin Islands. It is a Professional Fund as defined by the Securities and Investment Business Act, 2010 (SIBA).

The **investment objective** is to achieve capital appreciation in US dollar terms by investing primarily in US dollar-denominated equities of Russian companies (both locally traded and in the form of depositary receipts) and to a lesser extent in companies of CIS countries. The Fund aims to outperform the benchmark index (the RTS Index) in the long term.

The Fund uses a "long only" actively managed strategy, deriving returns from growth and value investing as well as arbitrage and short-term speculative strategies.

Manager Commentary

March was a good month for Russian financial markets, although local and some dollar-denominated stocks fell. Shares were headed upwards in late March and looked strong in early April. We expect mixed dynamics in April as the US reporting season approaches with the possibility of a spring sell-off on developed stock markets. Russian stocks are playing out a faster than expected decline of political and economic risks. The recent spurt by the ruble might be over but we expect more strengthening of the Russian currency later in 2015.

We bought GDRs of Lukoil and sold GDRs of Tube Metal Company in March. We expect a mostly positive environment for Russian equities in the medium term, following a possible dip in the spring.
