

RUSSIA DUAL RETURN FUND

LONG ONLY USD DENOMINATED

RUSSIA & CIS EQUITIES

July 2012

Fund Description

Russia Dual Return Ltd is an investment fund registered in the British Virgin Islands. It is a Professional Fund as defined by the Securities and Investment Business Act, 2010 (SIBA).

The investment objective is to achieve capital appreciation in US dollar terms by investing primarily in US dollar-denominated equities of Russian companies (both locally traded and in the form of depositary receipts) and to a lesser extent in companies of CIS countries. The Fund aims to outperform the benchmark index (the RTS Index) in the long term.

The Fund uses a "long only" actively managed strategy, deriving returns from growth and value investing as well as arbitrage and short-term speculative strategies.

Manager Commentary

Russian market was relatively calm in July and all downward swings were bought back confirming rising trend in equities. The Manager speculated with Sberbank shares and sold Acron on the back of price rally in shares of the fertilizer producer.

While we expect the uptrend to continue in August on expectations of further monetary stimulus, some positions may be cut to take profits depending on market situation. September meetings of major central banks may be decisive for further market moods till US elections in November. That said, volatility may rise by end of August – September, however we don't anticipate any collapse in equity markets in near term. We expect liquidity to remain cheap, average dividend yields to stay higher than bond payouts and rise of M&A activity on the back of low company valuations.
