RUSSIA DUAL RETURN FUND
LONG ONLY USD DENOMINATED RUSSIA & CIS EQUITIES
October 2012

Fund Description

Russia Dual Return Ltd is an investment fund registered in the British Virgin Islands. It is a Professional Fund as defined by the Securities and Investment Business Act, 2010 (SIBA).

The investment objective is to achieve capital appreciation in US dollar terms by investing primarily in US dollar-denominated equities of Russian companies (both locally traded and in the form of depositary receipts) and to a lesser extent in companies of CIS countries. The Fund aims to outperform the benchmark index (the RTS Index) in the long term.

The Fund uses a “long only” actively managed strategy, deriving returns from growth and value investing as well as arbitrage and short-term speculative strategies.

Manager Commentary

October was a weak month for Russian equities and negative sentiment even increased at the end of month ahead of US elections and on the back of still weak economic data from the Eurozone. The global economic and political environment has somewhat worsened over the past month, making us less optimistic about prospects to the year-end. However, we still see much value in Russian stocks. The Manager notes that discount of the Russian market relative to other emerging markets is now at a historical high (due to increased government influence on business), which could offer a good entry point for large players. Expected increase of Sberbank weighting in MSCI Russia in mid-November will offer support to local equities, as will the relatively weak dollar, caused by QE3.

We bought back NLMK and Lukoil shares for the portfolio this month.
