

3shape TRIOS® 3

Digital Impression Scanning

DTS in conjunction with Core3dcentres® are an authorised distributor and trainer for 3Shape TRIOS® - the world's leading dental scanner and software supplier. The new TRIOS® 3 is the 3rd generation TRIOS® with its three in one digital impression solution.

An intraoral scanner for fast and easy 3D colour impression taking; an integrated intraoral camera, so there's no need to purchase one separately, and shade measurement while you scan, for more accurate and predictable results. TRIOS® enables you to be more efficient, more precise and your patients more comfortable.

The 3Shape TRIOS® 3 comes in two options, the TRIOS® 3 Cart or the Pod Solution with the option for a handle or pen grip.

Indications:

- Anterior and posterior single crowns
- Inlays
- Onlays
- Veneers
- Bridges
- Implant Abutments
- Temporaries
- Digital Models for Orthodontics
- Post and Core Restorations

Advantages:

- Full arch scan in under 30 seconds in Real colour
- Extreme Mobility - The light and handy Pod solution is easy to share among treatment rooms or different locations
- Live 3D visualisation - View the digital impression being built on your PC screen during scanning
- Single hand operation - The newly designed scanner mount enables dentists to pick up and park the scanner with one hand
- Modern easy-to-use touch screen - Smart-touch screen provides full control
- Unique motion sensor interface - Like a gaming-controller, use the hand-held to virtually rotate and turn the digital impression
- Flexible connectivity with Wi-Fi and Bluetooth
