

# Opalite™ Zirconia Custom Abutments

## Strength, Beauty, Confidence

Opalite™ Zirconia custom abutments are the ultimate aesthetic restoration for all implant systems.

Opalite® Implants are designed, like most restorations, from the impression. However, what happens next is where it gets interesting. Rather than using the impression as a base and building up to the final restoration we use the Top-Down approach. This technique means we use the final design of the tooth to create the restoration; essentially, we create the final outcome and develop everything else around it. This approach is tried and tested and is one of the most effective methods used in implantology.

Opalite™ Zirconia custom abutments give you a strong reliable and highly aesthetic solution with no hidden costs. Analogue, screw, interface, abutment and restoration included.

### Indications:

- Replacing failing teeth
- Replace missing teeth

### Advantages:

- Strong enough to be used throughout the mouth
- Biocompatible
- Variety of shading available
- Compatible with most implant systems
- Suitable for single or multiple unit cases

### Disadvantages:

Difficult to retrieve unless soft cements are used and sometimes abutments must be prepared intraorally. Gingival retraction may be needed and there may be an increase in the momentum of force.

## Implant Restorative Dentistry

Our experienced team at DTS are highly trained in all aspects of implant restorative manufacture and are dedicated in finding solutions to even the most challenging cases. Our expertise in this field has seen us work with some of the most respected Implant Surgeons, Maxillofacial Surgeons and Prosthodontists in the country and has allowed us to become one of the leading implant laboratories.

Our technical advice team provides invaluable support when planning your more difficult cases and we like to ensure each case is looked at with a holistic approach to ensure the best possible outcomes for your patients.

We ensure all our restorations function correctly and maintain stability long term in the mouth. We focus on high end cosmetics and proper phonetics; and ensure correct soft tissue management for hygiene and aesthetic reasons.

We work with all major implant brands and we are happy to be involved with any case planning.

Just some of the implant brands we work with:

- Astra Tech Implant System™
- Avinent®
- BioComp™
- Biomet 3i™
- BioHorizons®
- BTI®
- Straumann
- Mis®
- Nobel Biocare®
- Simplir™ Implant Solutions

The above list is constantly being updated, if an implant brand you use is not listed above please contact us.

Help your patients understand your recommended restoration with our patient friendly cards.
