Protect Your Winning Smile

Benefits of Mouthguards:

- **Protection** - Protects your lips, teeth and jaw from most collision-induced injuries. Has multi-layered laminate for extra protection
- **Comfort** - Custom fitted to offer good retention and exceptional comfort
- **Minimal Interference** - Made especially for minimal interference whilst speaking and breathing even under demanding conditions

DTS Says:

"Protect your smile from injuries with our custom made comfortable mouthguards, available in various sizes"

Looking After Your Mouthguard

- Clean your mouthguard with tooth paste and brush before and after every use. Then rinse it with a mouthwash.
- Your mouthguard could do with a thorough soap and cold water wash at least once in a fortnight.
- Dentists advice that the mouthguards should be placed in a perforated container while storing or transporting, as this allows air circulation and prevents damage.
