Sleep Soundly Again with Silensor

Snoring a problem?

Dental appliance therapy might be the answer. . .

Benefits of Silensor:

- **Comfortable** - Non-bulky, easily adjustable & allows you to continue to mouth breathe with ease resulting in a better, more peaceful nights sleep
- **Easy to Use** - Just pop in before you go to sleep

DTS Says:

"Silensor is easy to use & effective. You owe it to yourself to sleep soundly again"

How Does The Silensor Work?

- The Silensor uses a pair of custom made plastic mouldings which you wear at bedtime.
- The sections are connected at the sides by short plastic links, which pull your lower jaw forward. This holds the airways open, reducing the constriction that causes snoring.
