# Make the Most of Your Smile

## Benefits of Implant Retained Bars:

- **Realstic** - Look and function like real teeth resulting in improved ability to chew
- **Highly cosmetic result** - Difficult to tell the difference between implants and real teeth
- **Supportive** - Maintains facial structure by preserving remaining jaw bones and need to remove at night

### DTS Says:

*"Realistic looking results with excellent function"*

## Looking After Your Implants

- Implants are a safe well established treatment. Much like natural teeth, they will last as long as you care for them
- Brush twice a day and visit your dentist every six months for a check up
