1) Euroopan vihreän kehityksen ohjelma

- **Esitämme, että ohjelman kokonaisuutta laajennetaan ottamaan myös huomioon vihreän teknologian vientimahdollisuudet ja niillä aikaansaatava positiivinen ilmastovaikutus - hiilikädenjälki.**

- Ilmastoneutraaliustavoitteisiin sitoutuneet maat kattavat jo yli 90% globaalista bruttokansantuotteesta ja vähähiilisten tuotteiden ja ratkaisujen markkinoille onkin syntymässä valtava kysyntä.

- Pärjätäkseen tässä kilpailussa Euroopan Unionin on kyettävä houkuttelemaan ilmastoratkaisuja kehittäviä ja niihin investoivia yrityksiä ajoissa.

- Tämä edellyttää systemaattista suunnittelua ja politiikkoja.

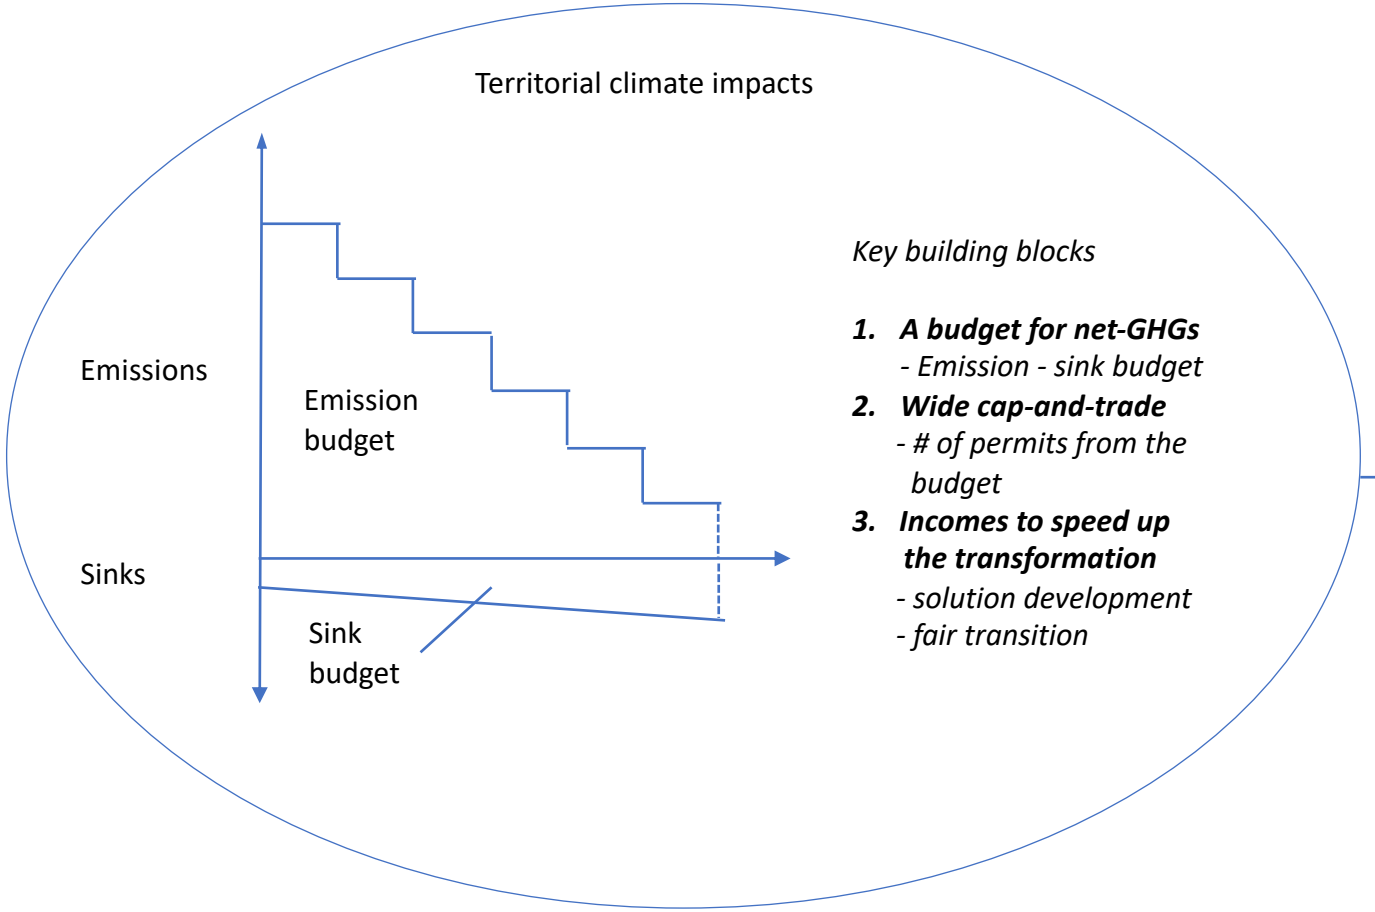

CLC policy proposals and results

Systemic solution and an effective carbon price

Climate impacts from imports

Key building blocks

4. Carbon footprint – based purchasing
5. Carbon Border Adjustment

Key building blocks

1. ***A budget for net-GHGs***
   - Emission - sink budget
2. ***Wide cap-and-trade***
   - # of permits from the budget
3. ***Incomes to speed up the transformation***
   - solution development
   - fair transition

Climate impacts from exports and finance

Key building blocks

6. ***Carbon handprint effects from climate solutions and finance***

4) Vahvempi Eurooppa maailmannäyttämöllä

- **Ehdotamme, että EU ottaa vetovastuun globaalin CO2-hinnoittelukoalition kehittämisestä.**

- Laaja kansainvälinen CO2-hinnoittelu loisi ja vahvistaisi markkinoita ilmastoratkaisuille sekä tasaisi kilpailuasetelmia eri maiden välillä.

- Olimme tyytyväisiä, että komissio esitteli jo tällaista toimintamallia Glasgow'n ilmastoneuvotteluissa.

Worldwide coalition for carbon pricing is needed

DISCLAIMER: All opinions in this column reflect the views of the author(s), not of EURACTIV Media network.

The best way to ramp up non-CO2-emitting investments and to ramp down emitting ones would be to set an effective price for greenhouse gases, argue Jyrki Katainen and Karl-Henrik Sundström. [UNclimatechange / Flickr]

Comments Print

Two-thirds of the Paris Agreement signatories are using or considering carbon pricing schemes to achieve their emission reduction targets. The EU, China, and the USA should lead a worldwide "carbon pricing coalition" for the period 2030-2050, argue Jyrki Katainen and Karl-Henrik Sundström.

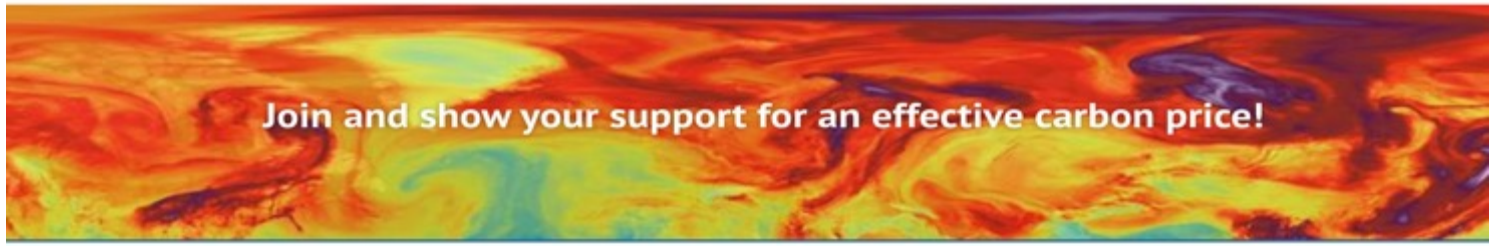

Jyrki Katainen is the vice-chair of Climate Leadership Coalition. He is a former vice-president of the European Commission and former prime minister of Finland.

Karl-Henrik Sundström is chair of Climate Leadership Coalition. He is the former CEO of Stora Enso, a Finnish manufacturer of pulp, paper and other forest products.

CLC made a proposal 10 December 2020 and in 2021 this would be our main initiative. We aim for global reach to get wide business support for effective carbon pricing.

CALL ON CARBON

For ramping up climate investments and carbon pricing

JOIN SIGNATORIES PARTNERS WHY NOW EVENTS NEWS ABOUT US

We, the undersigned, call on governments to:

- back their net zero targets with effective, robust, reliable and fit-for-purpose carbon pricing instruments, consistent with the Paris Agreement, to facilitate a cost-efficient investment path to reach net zero emissions;
- align their carbon pricing instruments where appropriate to create a stable and predictable investment environment; and
- finalise the rules for international market mechanisms under Article 6 of the Paris Agreement to support cost-effective mitigation efforts, create a level playing field and minimise carbon leakage while enabling greater ambition

Actions by EU in COP26

Speech | 1 November 2021 | Glasgow

Speech by President von der Leyen at the UN Climate Change Conference (COP26)

"We need to agree on a robust framework of rules, for example to make global carbon markets a reality. Put a price on carbon, nature cannot pay that price anymore."

https://ec.europa.eu/commission/presscorner/detail/en/SPEECH_21_5741

SPEECH | 10 November 2021

Frans Timmermans at COP26 Carbon pricing in the European Union: an invitation to the world

"We know that carbon pricing works. The Emissions Trading System currently covers 45% of all EU emissions and applies to around 10,000 installations in the power sector and manufacturing industry, as well as to over 500 airlines. Since its introduction in 2005, emissions from the ETS sectors have been cut by around 43%.

I think it's making school, because besides the European system, Canada, China also, Japan, New Zealand, South Korea, Switzerland, and parts of the United States are either operating or developing their own systems."

”Toimin puheenjohtajana Glasgow’ssa YK:n ilmastokokouksen yhteydessä järjestetyssä valtiovarainministerien ilmastokoalition ministerikokouksessa, jossa käytettiin useita puheenvuoroja hiilen hinnoittelun edistämiseksi. Tätä ovat vaatineet myös monet yritykset ja elinkeinoelämän järjestöt Climate Leadership Coalitionin ja sen kumppaneiden Call on Carbon -aloitteessa ilmastokokouksen alla. Hanke on erinomainen ja erittäin ajankohtainen”, toteaa valtiovarainministeri **Annika Saarikko**.
