

Acoustic Barrier

Project summary

Industry Partner(s):

Northern Gas Networks

Innovator:

Echo Barriers

Challenge:

Noise complaints halted street works, a solution to allow work to resume quickly was needed.

Approach:

A call looking for a market ready solution was launched

Outputs:

A versatile acoustic barrier that can be attached to site boundaries was sourced, resulting in a significant reduction in noise allowing work to resume.

Impact:

Incremental

Key benefit:

Pace

8 weeks from call to implementation

Additional benefits:

Financial

Removed costly delays to work

Reputational

Reduction in complaints for noise and disruption
