Hollywood!... In Hollywood there are two kinds of people. The ones in front of the camera and the ones behind! But in the end, we know who it's all about – it's all about the Stars!

...Right?

Bloopers is an entertaining 5 reel slot, designed for Mobile First with symbols covering 100% of the mobile screen. It is a fairly volatile game, aimed at a maximized mobile casino experience. The game features 243 paylines.

The theme is based on a chaotic movie set, where the important final scene is just about to be shot. The two main movie stars (in their own respective eyes, of course the most important person on the set) are a couple of proper divas, constantly fighting to outshine each other.

The set is also littered with a team of small, charming characters – the Bloopers. All with various jobs, such as sound technician or makeup artist, they constantly stumble and fumble about, making life hard for the divas. Throughout the game there are five different Bloopers to be discovered. It is always in the favor of the player when they appear. Handing out Random Wilds, Sticky Wilds and Expanding Wilds, the Bloopers have every flavour of Wild covered. And added to all this extravaganza the player is also treated to Falling Reels and Extra Free Spins. All in all, an award-winning gaming experience!

BETTING STRATEGIES

Are you looking for more action?

Many players change the bet size based on the outcome of previous gameplay. ELK introduced a new way of playing casino games with the launch of BETTING STRATEGIES. A betting strategy is a predefined betting pattern that automatically changes the bet level depending on a set of rules. A player can change or turn off the betting strategy after any bet. Betting Strategies work well in combination with Auto Play.

Optimizer – bets a % of balance

The bet level will be changed automatically to a percentage of the player's balance. When the balance increases the bet level follows up automatically, and vice versa when the balance decreases.

From 1% (Casual player) to 10% (High roller) of the bet balance.

Leveller – raise on 5 concurrent losses

The bet level will increase 2 steps after 5 concurrent losing rounds. After another 5 losing rounds the bet level will increase 2 more steps.

Bet levels will be reset to base level after a winning round.

Booster – raise on loss

The bet level will increase one step after every losing round until reaching 4 levels above base level (e.g 10 times base level)

Bet levels will be reset to base level after a winning round.

Jumper – raise on win

The bet level will increase after every winning round until reaching 4 levels above base level (e.g 10 times base level).

Bet levels will be reset to base level after a losing round.

Recommended size and ratio for desktop browsers

For the optimal gaming experience, ELK Studios recommend launching the game in 1600x900 resolution. If scaling is required, use 16:9 ratio.

Technology

Our games uses state of the art web technologies including support for canvas and WebGL. The client detects the capabilities of the device regardless if the player is running on a desktop, tablet or mobile.

The game client will then optimize the gaming experience based on those parameters.
