An architectural vision that blends with nature

Inspired by the finest elements of Creole architecture, Les Méléanes redefines modern tropical living. Designed to integrate seamlessly into the lush surroundings of Azuri, every architectural detail has been carefully considered to create a fluid landscape between home and nature.

Privacy is paramount: ground-floor residences blend into the landscape, offering a secluded and tranquil ambiance. At the heart of the project, a tiny forest, created in collaboration with the estate's landscape architect, enhances the living space with freshness, biodiversity, and serenity.

This innovative concept is both aesthetically pleasing and sustainable, turning nature into an integral part of Les Méléanes.

This space isn't just a residence. Les Méléanes represent a lifestyle where well-being meets a commitment to the environment that surrounds it.
