

## Fidelity's funds registered in Qatar

The purpose of this document is to provide further details on certain sustainability features of certain Fidelity's funds, such as the applicable categories of the Fidelity Sustainable Investing Framework (FSIF), the applicable categories of the Exclusion Framework as well as the product specific exclusions on top of the Exclusion Framework. For further details on the fund, please refer to the fund's prospectus. For further details on FSIF and the Exclusion Framework, please refer to:

<https://fidelityinternational.com/sustainable-investing-framework/>

The list below is not exhaustive. For information related to Fidelity dedicated products (funds and mandates) not referred to below, please refer to the product's precontractual documents.

### Remarks on the table columns:

(1) FSIF Category: The Fidelity Sustainable Investing Framework (FSIF) is composed of three categories: (i) ESG Unconstrained includes products that aim to generate financial returns and may, or may not, integrate ESG risks and opportunities into the investment process; (ii) ESG Tilt includes products that aim to generate financial returns and promote environmental and social characteristics through a tilt towards issuers with stronger ESG performance than the product's benchmark or investment universe; and (iii) ESG Target includes products that aim to generate financial returns and have ESG or sustainability as a key investment focus or objective, such as investing in ESG leaders (issuers with higher ESG ratings), sustainable investments, a sustainable theme or meeting impact investing standards. Finally, a number of products still refers to the Legacy Product Framework.

(2) Market or Equal weight: Where a fund's investment policy states that the fund aims to achieve an ESG score of its portfolio greater than that of its benchmark or investment universe, the weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark or investment universe using a weighted average or equal weighted method of calculation. This column sets out which is applied.

(3) Primary ESG Rating Used: Fidelity ESG ratings and ESG ratings provided by external agencies are used within our framework. This column shows the primary ratings used, where no rating is available from the primary provider (i.e. Fidelity), a secondary source of ratings is used (i.e. MSCI).

(4) Exclusion Framework Category: The Exclusion Framework is composed of three categories: (i) ESG Unconstrained includes controversial weapons exclusions; (ii) ESG Tilt includes ESG Unconstrained exclusions and further exclusions such as tobacco production, thermal coal, norms-based exclusions as well as exclusions relating to sovereign issuers; and (iii) ESG Target includes ESG Tilt exclusions and further exclusions such as additional controversial weapons, conventional weapons, semi-automatic weapons, tobacco, thermal coal, Arctic oil and gas, oil sands, and additional exclusions relating to sovereign issuers.
