

BIOSOLVE™ **PURGE**

urinal trap treatment

*“Hygiene through
continuous maintenance”*

When outlet pipes in urinals and shower cubicles block with organic debris it causes the waste to drain away very slowly, which provides the perfect environment for bacteria to breed and cause persistent bad smells.

Cleaning these drains can be a difficult, expensive and time consuming activity. Biosolve™ Purge's powerful formulation breaks down the surface of organic waste before releasing enzymes which eat through the waste, therefore reopening the pipe.

Using Biosolve™ Purge is simple - place the sachet into the effected urinal bowl or shower drain, pour on 500ml of water to dissolve the sachet and leave for 15 minutes. Rinse away after treatment, you will see immediate improvements.

*Quadrasan® Biosolve™ Purge ...the most effective solution
to unblock urinals...instantly!*
