

MAKING A BUMBLEBEE HOME

What you need:

- A flowerpot
- A piece of slate/ tile
- A bit of tube or pipe
- Some nesting material

Instructions:

1. Sink the upturned flowerpot into the ground and use the slate/ tile to cover any drainage holes to keep the rain out.
2. Run a hose or pipe underground to the pot, leaving a prominent entrance. Be sure to make drainage holes in the pipe. If you have no hose don't worry the bees may access from the holes in the top.
3. Finally, fill with a generous handful of nesting material, such as old bedding from a pet mouse, guinea pig, old wool, etc.
