Figure S6

The figure shows a Kaplan-Meier survival curve with the x-axis representing days and the y-axis representing percent survival. Three groups are compared: control, full-vac 2X +13F3, and full-vac 1X +13F3. The curve for the control group is shown in black, the curve for full-vac 2X +13F3 is shown in red, and the curve for full-vac 1X +13F3 is shown in blue.
