

Floodlight Shutdown Procedure

Step 1 Open the unit to access the control panel.
Turn the lights off in turn allow a 10 second interval between each light.

Step 2 Turn the Main Breaker Switch off.

Leave the engine running.

Ensure that all the lights have switched off.

Step 3 Turn the ignition key from the RUN position to the Off position.

The engine should stop!

Step 4 Turn the winch handle anti clockwise to lower the mast until it is fully housed.

The cable will begin to go slack, at this point turn the handle clockwise to the first click.
