

The Menston Juniors philosophy.

It is our aim to provide a safe and child friendly environment for local boys and girls to participate in the sport of football.

Our club ethos is to be inclusive to all and to support the development of all our members as footballers and individuals whatever their ability or current stage of development. The health and wellbeing of our members is important to us and we aim to provide a positive experience for all.

We are continually reviewing our approach and try to offer the very best and most appropriate development methods available.

We are committed to the development of all our players and put that first before results as we see this as the true meaning of success at junior football.

We believe that we are at our most creative when we are young and work hard not to stifle this creativity when developing individuals and encourage a creative mindset in all our players and Coaches especially on match days when an overbearing will to win may overshadow the long term development of players.

We will continue to strive to help all players to reach their full potential in football and in life!
