

RFU launch concussion animation for young players

The RFU has launched a short animation on EnglandRugby.com aimed at making young players (within the 14-18 age group) aware of how to spot concussion and how to safely manage returning to school and sport following an injury. [Watch video >>>](#)

The short film is the latest addition to the "Don't Be a Headcase" programme; an extensive online resource to help people prevent concussion injuries and Recognise, Remove, Recover and Return safely if an injury should happen.

We want to ensure broad awareness of this issue so feel free to share via your own channels. Click [HERE](#) to view the video on EnglandRugby.com and for more information on the Headcase programme.
