"THE

# STADIUM" A PLACE OF LEGEND

*WHERE HOME MEETS AWAY, THE UNDERDOG BECOMES THE CHAMPION.  
WHERE STRATEGY MEETS SPEED, STRENGTH MEETS FINESSE AND COURAGE MEETS  
SKILLS. EVERYONE CAN EXPERIENCE A SMALL MOMENT OF GLORY AND ELATION.  
THAT FEELING CAN BE YOURS. CREATE YOUR OWN STADIUM.*

# "THE

## BALANCE BETWEEN TRUE TRADITION AND ONWARD INNOVATION

*DO NOT LOSE SIGHT OF WHERE YOU CAME FROM, BUT KEEP MOVING AND STAY FOCUSED.*

## SHAPED BY EXPERIENCES THAT UNITE MILLIONS OF PEOPLE

*UNITED BY THE GAME.*

## TO ENJOY THE ACTION ON THE FIELD

*EVERYONE CAN EXPERIENCE THAT FEELING OF GLORY AND ELATION.*

- TRADITION** Our designs honour the legacy and tradition of the brand. The true incentive of the design is its function.
- MODERNITY** Stand out from the crowd. Within the boundaries of teamwear, we create a big impact.
- INNOVATION** Innovation to us is a continuous process to sustain and develop the high standards of our brand.

- EXPERIENCE** We have acquired knowledge and skills through many successful years of business.
- UNITE** The interest of the team is paramount. We think in terms of 'we' instead of 'me'.
- STRATEGY** The desired results can be achieved with the right tactics.

- ENJOY** We create a pleasant and creative atmosphere. We believe that's the kick off to success.
- GLORY** Stanno provides all the products necessary for moments of glory.
- COLLECTIVE** Together we can make it happen. Success is a joint effort.

On photographic reproduction and print some colour changes may occur between pictures and original products. We reserve the right to make product/technical changes (in design, colour, function and material), which we feel, will make for improvement of the product. We will not accept any responsibility for printing errors in the catalogue! All Stanno products are suitable for printing, front or back.

Garment care: Stanno products are made to the highest standards and are subject to strict quality control procedures. Garments however can discolour due to substances such as mud and grass, liniment or oil, and of course perspiration, all of which may not be fully removable by washing. The extent of discolouration can be greatly reduced by following a few simple procedures. Soaking and/or washing of the garment in water and detergent as soon as possible after use can reduce discolouration, using at least the same volume of water as the garment being treated. Always follow detergent manufacturers instructions, especially those intended to tackle heavy stains and avoid products containing bleach. Stanno International cannot accept any liability for discolouration or damage to garments resulting from staining caused by elements foreign to the materials used in manufacture.

All catalogue prices are recommended prices inclusive of VAT. The copying of products, in whatever form that may take, is forbidden without the prior written consent of Stanno International. Stanno International reserves the right to modify product specifications and prices at any given time.

# QUALITY FABRICS

ClimaTec material is a comfortable, warm, lightweight material, fast drying and easy to maintain. The advanced micro fibres transport the body fluids and keep you comfortable in many weather conditions.

ClimatePoly fibre has thermal qualities and is easy to wash. The unique knitting methods result in a very fine-grained structure on the inside and an open structure on the outside. Moisture is transported optimally and quickly.

ComfortTec material is a very comfortable material. It keeps the body warm with its soft brushed inner.

MotionTec material is comfortable, lightweight and tight fitting because of the yarn used and the knitting technique. The fabric has a high stretchability because of the high level of elasticity in the product. It's functional and durable, perfectly suited for indoor sports.

TTS is a highly functional and durable material. Extremely suitable for strenuous exercise. The material is easy to wash which simplifies maintenance.

Sportpolyester has a thermal effect and is easy to wash, which simplifies maintenance. It protects against cold wind and is a great combination of a functional and durable product.

WovenTec increases the wearing comfort and provides a soft feel. The material has a luxurious appearance. WovenTec products are not only functional during sport activities but also perfectly suitable for presentations.

Coated articles with taped seams, including rain gear and all weather jackets, are finished with a special coating. Depending on the type of coating the articles are waterproof, windproof or water-repellent.

Marfil® is the brand name of a polypropylene fibre. Polypropylene is a thermal fibre with the lowest specific weight available. It is moisture resistant and moisture transportable. Polypropylene is 100% real colour, non-shrinking and recyclable. It gives perfect comfort to your feet and avoids skin irritation. Stanno specifically uses polypropylene for high quality sports socks.

Sizes XXXXS - XS Recommended for children 14 years and under.

For shirts with dual sizing use largest size E.G. M/L - 38/40.

# TEAMDRESSER

The Teamdresser is a unique dressing tool whereby you can compose your own Stanno Collection club presentation, whether you're a player, club official, trainer or member of the board.

The Teamdresser is a virtual dressing room in which you can select different shirts, suits, pants, bags and other accessories, based on your club colours. You have an enormous variation to choose from. Please visit [teamdresser.com](http://teamdresser.com) to start choosing your club collection.

**Create your team outfit**

**Make clear calculations**

**Save your outfits**

ONLINE ON COMPUTER OR TABLET**

[WWW.TEAMDRESSER.COM](http://WWW.TEAMDRESSER.COM)

**STANNO SPORTS** WOULD LIKE TO INTRODUCE YOU TO THEIR **CLUB SPONSORSHIP/REWARD PROGRAMME**

The package is an ideal opportunity for any reasonably sized club or organisation looking to form a solid stable partnership with a reputable Teamwear Brand.

We guarantee you excellent stock levels, product continuity, fantastic service, and a great quality product!

We can also show you how to create your clubs identity by choosing from our wide selection of products and using our unique Teamdresser system.

**THIS PROGRAMME IS AIMED AT CLUBS, UNIVERSITIES, COLLEGES, LOCAL AUTHORITIES AND BUSINESS ORGANISATIONS.**

The Club or the Beneficiary will receive an amount of Free Stanno Product from the Sponsor (Stanno), dependant on the how much the club or organisation spends over the length of the agreement.

The agreement is based on either a 2 or a 3 year deal.

An example of how this new agreement works is that if a club/organisation spends £4000.00 per annum (at Stanno RRPrices) over a 3 year period they would be entitled to £900.00 of free product. Obviously the more the spend the greater the amount of free product.

At the beginning of the agreement, after the contract has been signed, the club will place an order with the Sponsor (via its selected retailer). When the amount reaches the minimum spend, as per the agreement, the club will receive an amount of free product as agreed and of their choice.

If no order is received, or the orders do not reach the agreed value, then no free product will be provided.

In addition Stanno will also show you how to merchandise selected products to your members and friends and generate an income for your Club or Organisation.

## POLYPROPYLENE

- Marfil® is the brand name of a polypropylene fibre. Polypropylene is a thermal fibre with the lowest specific weight available. It is moisture resistant and moisture transportable.
- Polypropylene is 100% real colour, non-shrinking and recyclable. It gives perfect comfort to your feet and avoids skin irritation.
- Stanno specifically uses polypropylene for high quality sports socks.
- Socks are made of 86% polypropylene, 8% elastane, 4% cotton, 2% polyamide.
- All socks have flat seam stitches.

## SPECIAL DESIGN LOGO SOCKS

Other than our wide sock selection we can produce any colour combination of your choice, or a sock with a unique club logo. You make the choice of colour combination and/or logo. Please contact your local team-wear-dealer and ask about the possibilities for special design logo socks.

Price, delivery time and minimum quantities are available on request. No development costs.

# GOALKEEPERS

# FOAM MATERIAL

## GRIP DURING DRY WEATHER CONDITIONS

The adhesive properties of the foam are decisive for an optimal grip and the best performance. The weather is a big influence on the properties and performances of the foam material. Playing during dry weather requires specific foam components for optimal results.

## GRIP DURING WET WEATHER CONDITIONS

Moisture, rain and wet conditions affect the grip and require additional components for a better grip. A softer and more open foam structure absorbs the water and is very suitable for wet weather conditions.

## CUSHIONING

As well as grip, cushioning is an important factor in determining the most suitable goalkeeper gloves. The softer and thicker the foam, the better the impact of the ball can be absorbed. Also the thickness of the basic material of the gloves determines the amount of cushioning.

## ABRASION RESISTANCE

Foam is a very soft material that needs special treatment. Regular ball contact leads to wear and tear of the foam. The degree of wear is determined by the surface structure and the density of the foam material. A more coarse and closed foam structure will lead to less wear.

Hyper Foam provides an excellent grip in both dry and wet conditions. In rainy matches the moisture is absorbed by the foam, which greatly improves the grip. In dry conditions gloves with Hyper Foam do not need to be moistened during matches or training, because of the absorptive capacity of the foam. Hyper Foam also increases ball control and ensures a comfortable fit.

Aqua Foam offers optimal grip in wet conditions. The soft and more open foam structure takes up water, which – in comparison to other types of foam – provides a 25% better grip. Additionally the Aqua Foam gloves contain an extra shock absorbing function to reduce the impact of hard shots.

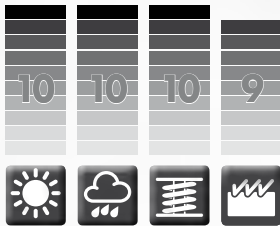

The changing needs of professional keepers require that the characteristics and quality of the foam continually develop. Super Soft Profi Foam has excellent properties for grip in both dry and wet conditions, and it also offers excellent cushioning. The use of the latest materials ensures durability and optimal comfort.

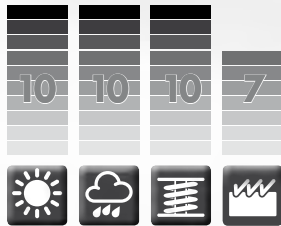

Soft Foam provides a reliable grip and excellent cushioning. Soft Foam ensures maximum ball control and optimal comfort.

Extensive tests prove that quilted reinforcement can reduce injury by up to 50% due to the extra protection.

With this in mind, Stanno has developed a revolutionary sock. The sock has three layers of quilted reinforcement in all the key areas, the calf, Achilles tendon, malleolus and the ankle. This specially developed sock gives the best protection possible against shocks and injuries. This revolutionary development is a step forward in our pursuit of an optimal protective garment offering unprecedented support and protection to the sportsperson. All other Stanno branding and sole comfort remains standard as in all of our team socks. If you want to be the best, wear the best.
