COVID-19: PRACTICAL COACHING RISK ASSESSMENT

RISK: Spread of Covid-19

WHO CAN BE AFFECTED:

- Coaches, Players, club members and visitors to your club.
- Vulnerable groups elderly, pregnant workers, those with existing underlying health conditions.
- Anyone else who physically comes in contact with training groups/individuals

Wilmslow RUFC CLUB NAME:

COMPLETED BY:

Tony Smith, Junior Chair

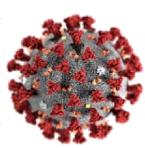

DATE COMPLETED:

March 2021

Managing, preventing and controlling risk

The HSE requires businesses, including sports clubs and venues, to identify Memorial Ground, Kings Road, Wilmslow SK9 5PZ anagement responsibilities with regard to managing risks and to put contingency plans in place.

> If the club has direct employees then someone competent should be appointed to help meet health and safety duties and take responsibility for controlling any identified risks. This person could be inside or outside of the club or venue. For all clubs, we recommend that someone takes responsibility for coordinating the management of risk and keeps records of the steps taken to mitigate these (businesses with five or more employees are required to keep records of any significant risk and this is good practice for all businesses).

We recommend that all coaches / venues complete a Covid-19 specific risk assessment. Look at how this might apply to your club / coaching sessions, continue by identifying the hazards that are the real priorities in your case and complete the table to suit your environment. This template is to be used as a guide to completing a full risk assessment at your venue in order to safely open up your club. This is not an exhaustive list and we highly recommend that you complete a full risk assessment for your venue and review on a weekly basis.

Covid-19 is a biological hazard, and like any workplace hazard, appropriate control measures will need to be put in place to reduce the risk of someone being infected. Normally, the goal is to eliminate hazards where possible; however, unlike a faulty piece of equipment, the virus cannot simply be removed. Instead, the aim is to introduce suitable and sufficient control measures to reduce the risk of contracting the virus to as low a level as is 'reasonably practicable'. In other words, precautions should be implemented, but the time, cost and effort involved in implementing a control measure should be reasonable, when compared to risk posed by what you are controlling.

Things to consider

- You should keep a register of anyone attending a training session to help manage "track and trace" if an infection is reported by someone present.
- · Care should be taken with regard to sharing of equipment and other items, such as water bottles. Handling shared items and then touching the face is one way the virus
- Potentially there is a risk of increased droplet spread when breathing hard during exercise or moving quickly, compared to when people are breathing normally and are stationary or moving slowly. It is sensible wherever possible to maximise the distance between people when doing training.
- Have you considered how COVID-19 affects how you would administer first aid? St John's Ambulance provides advice on what to consider at https://www.sja.org.uk/getadvice/first-aid-advice/covid-19-advice-for-first-aiders/
- Remember your safeguarding policy. It is important that everything you do is aligned with existing policies intended to protect members, coaches and employees.
- Finally, what do you do if someone is not complying with the actions you've taken to manage the risks of COVID-19? It is sensible to have agreed actions to deal with unacceptable behaviour before an incident occurs.

What are the hazards? Transmission of COVID-19			
Who might be harmed? Facility users, staff, volunteers, visitors and the wider con		nunity	
No Controls required		Action Taken by the Club	
Facility Capacities			
Have you determined the safe capacity of your field of play and grounds for both organised rugby activity and off-pitch activities (subject to the Rule of 6 or as a group made up of two households), accounting for social distancing, legal gathering size limits and supervision ratios where applicable?		Pitch capacity determined to hold at least 120 players including all pitches at the club + 3 pitches at Jim Evison Field. Per Stage D coaching activity guidance coaches will manage group size according to coach:player ratios, by age group Club coaching staff briefed.	
Organised activities			
Have you reviewed playing guidance and made suitable adaptation to your approach to practice and matches?		Coaches & managers briefed before 29 th March (coaches) and before matches start (team managers). Coaches have circulated RFU return to rugby guidelines to members & parents (Stage D1 & D2) including reminders of: - No sharing of water bottles or food - No huddles - No handshakes - Minimal contact unless explicitly guided by coaches	
	ratios and adapted group sizes for supervised children's u ensured safeguarding procedures are being followed, even	All applicable safeguarding procedures remain in place. DBS checks complete & current. Coach:player ratios remain as per RFU guidance	
Have you assessed and implem limited exceptions – see guidar	ented control measures for preventing spectators (with nce?	No spectating at stage 1b (29 th March). Parents requested to drop & collect only (no spectating) as part of return-to-rugby correspondence from coaches.	

Establish what restrictions are in place for your venue location including restrictions on gathering size limits in line with the UK Government Roadmap and ensure your control measures are appropriate. Self-screening of individuals before they arrive at the venue to ensure individuals displaying COVID symptoms or those who should be shielding do not travel or attend. Ensure that NHS Test and Trace data collection system is in place and that it is compliant with Information Commissioner's Office guidance. Ensure that NHS Test and Trace data collection system is in place and that it is compliant with Information Commissioner's Office guidance. Ensure that your NHS QR Code poster has been produced and displayed for use by visitors. An assessment of user numbers, space capacities, venue circulation and layout planning to maintain social distancing. A plan for where parents and players will sit whilst watching rugby activities. Signage and communication so that all participants and visitors (including spectators) are aware of the control measures in place and how to act appropriately to minimise the risk of transmission of COVID-19. Staff and volunteer training to support the implementation of the plan, with suitable training records. Assess ventilation in your building (natural and mechanical) and take appropriate measures to maintained, and establish a suitable circulation system / one-way system. Use signage and foor markings to communicate this. Assess the arrangement of seating areas to maintain social distancing and minimise the risk of transmission.
