

## Size Guidelines - Men's Blazers

Our sizing is broken down into **fit & size**.

### FIT

Fit refers to how clothes fit the body, we offer the below options for this product:

**Slim Fit** - slimmer cut through chest & waist with tapered sleeves for a trim fit.

**Classic Fit** - tailored cut through chest & waist for a stylish but traditional fit.

**Mighty Fit** - generously cut through chest & waist with fuller sleeves & legs for effortless wear.

### SIZE

For each fit & size we provide the **actual dimensions** so you can double check your actual body measurements for the fit & size selected.

Remember these are the **ACTUAL** measurements used to make your blazer.

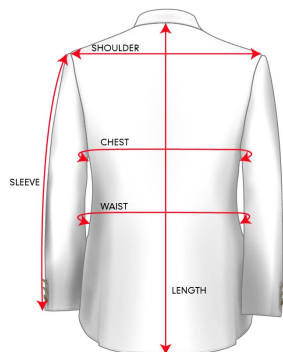

Take your measurements over the top of a comfortable undershirt and do not pull the tape measure tight. If the measurement is skin tight your blazer will not fit and you need to size up!

### MEASURING GUIDE

**Shoulder width:** This is the distance between your shoulder seams, measured straight across the back with the tape measure laid flat. Make sure you measure from the outermost part of your shoulders to get the most precise fit.

**Chest:** Keeping the tape horizontal, measure around the fullest part of the chest. It may be easier to get someone to help you.

**Waist:** Place the tape around your natural trouser line, below the navel.

**Sleeve length:** Measure from the top of your shoulder, where the shoulder seam would meet the top of your arm, take the tape down the edge of the cuff. You can select our standard measurement or provide your own.

**Back length:** Measure from the back of your neck, where your shirt collar would normally sit, down to the hemline. You can select our standard measurement or provide your own.

± 1 inch / 2.5cm production tolerance.
