Health & Safety Approval Signature:	
Health & Safety Approval Name & Date:	28/3/21

Identify: What are the risks? These may be physical (e.g. trailing wires), environmental (e.g. noise), or mental (e.g. workload)
Who: Who would be at risk of harm?
Evaluate: How can we reduce the risk? Use the hierarchy below
Record: Complete this Risk Assessment with all relative information
Review: The same task can have different risks on different days, often depending on variables such as people / weather. Review the Risk Assessment prior to beginning the task to ensure it is still suitable.

Likelihood	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
HCFE Risk Matrix	1	2	3	4	5	Severity

Rating	Likelihood	Severity
1	Very Unlikely	No First Aid or Damage
2	Unlikely	First Aid / Damage Only
3	Possible	Lost Time Injury (1-7 Days)
4	Likely	Major Injury / Permanent Ill-health
5	Very Likely	Fatality

**It is the statutory duty of all staff and coaches to explicitly follow all control measures identified in this document
Consider all possible control measures to ensure the risk is as low as is reasonably practicable.**

Remember: PPE is the last line of defence and will only reduce the severity of an accident that has already happened. Consider if there are other controls that will reduce the chances of the accident happening in the first place.

Completion Notes:

- Consider each hazard individually, and what the outcome would be if the risk materialised e.g. the hazard may be some trailing wires, the risk would be somebody falling over and injuring themselves.
- Using the table above, consider the likelihood of each risk materialising, and then the severity of the outcome. Multiply these together for the initial risk rating.
- Detail what control measures will be put in place to reduce the overall risk, e.g. Good housekeeping prior to beginning the task will reduce the chances of somebody falling over a trailing wire.
- Now that the control measures are in place, review the likelihood and severity, taking the control measures into account. Multiply these together for the residual risk rating – ideally this should have decreased.
- If there are any additional control measures that are required but are not yet in place, detail these in the commentary along with any actions required to put these in place, e.g. order some tie wraps to help avoid trailing wires.

Coronavirus disease (Covid19) is an infectious disease caused by severe acute respiratory syndrome. The virus is primarily spread between people during close contact via small droplets produced by coughing, sneezing and talking. People can also become infected by touching infected surfaces and then touching their face. Symptoms include: A new and continuous cough; a high temperature; or a loss of or change in normal sense of smell and taste (anosmia).

Hazard	Risk	Likelihood	Severity	Initial Risk Rating (Likelihood x Severity)	Control Measures	Likelihood	Severity	Residual Risk Rating (Likelihood x Severity)
Close proximity of people within the cricket grounds not maintaining social	Possibility of infection of Covid 19 which may lead to ill health or death	4	5	20	Coaches and players have been informed about keeping social distance (2 meters apart) through club procedure. Clearly displayed	1	5	5

<p>distance measures</p>					<p>posters will positioned to remind people of social distancing. A one-way system will be set-up with a clear path for attendees to follow. Cones will be set-up for equipment to be left at 2-meter distances. Playing bubbles of no more than 8 will be permitted for the nets : 6 bowlers, 1 batter and 1 batter padding-up.</p>			
<p>Potential spread of infection</p>	<p>Possibility of infection of Covid 19 which may lead to ill health or death</p>	<p>3</p>	<p>5</p>	<p>15</p>	<p>HCC booking system must be used to book sessions. All attendees to follow procedure in terms of hand sanitation and social distancing. One way-system must be followed. A cleaning station will be provided for attendees to use. All equipment to be cleaned down after use by coaches and captains and no equipment to be shared. All debris to be placed in the bin provided. Coaches and captains to ensure Juniors and Seniors are meeting social distancing guidelines. Coaches made aware not to turn up to sessions too early, or leave too late. Attendees to bring their own food and water bottle. A responsible person designated by HCC will attend to oversee rules are being followed. Attendees to remain in their allocated groups at the specific session. Attendees must use hand sanitiser before and after entering</p>	<p>1</p>	<p>5</p>	<p>5</p>

				<p>the grounds. No spitting, shouting, or singing is to take place and no saliva or sweat is to be added to the ball. Anyone with symptoms of Covid 19 must stay at home and isolate for the then prevailing period of time. Coaches may choose to wear appropriate hand coverings, such as mitts, or gloves when handling the ball. When batting the batter must return the ball by kicking it, or hitting it with their bat. Equipment must be kept at each players cone at a two-meter distance these will be provided by HCC there will be 8 designated cones per net. If after using the nets attendees feel unwell, or any member of the household tests positive for Covid 19 the Attendees agree to inform HCC of this as soon as possible. Players should remain socially distanced at all times with exception of the wicket keeper standing up to the wicket and slip fielders. Non-striker should social distance from umpire and run on opposite side to the batter on strike. A hygiene break is to take place every six overs. The wicket keeper is required to return the ball directly back to the bowler. Only one person</p>		
--	--	--	--	---	--	--

					is allowed in the score-box at a time. When the ball leaves the field of play it must be retrieved by an on-field player. Players must return to their vehicles in the event of inclement weather.			
First Aid and Accidents	Possibility of infection of Covid 19 which may lead to ill health or death	3	5	15	If an attendee needs first aid the response will initially be from the person in their bubble. PPE must be used to administer first aid, gloves, mask, apron must be worn and then administer first aid. All coaches should have their own first aid box and HCC will also provide one which will be kept in the Admission Hut. All debris must be placed in bins provided. All first aid and accidents must be recorded in the accident book which will be placed in the Admission Hut.	1	5	5
Cleaning Arrangements	Possibility of infection of Covid 19 which may lead to ill health or death	3	5	15	After each session all equipment must be sanitised after use, ie. stumps, cricket balls and cones. Coaches must clean equipment provided by HCC, including stumps, balls and cones. Attendees must clean their own equipment any debris to be put in bins provided.	1	5	5

Parents or guardians watching juniors	Possibility of infection of Covid 19 which may lead to ill health or death	2	5	10	If a parent, or carer needs to attend due to safeguarding reasons they must stand beside the net, two meters away : only one attendee per child.	1	5	5
