REGIONAL NETWORK DISTRIBUTION

Basic charge	211,29	262,00	€/month
Active power	0,97	1,20	€/kW, month
Reactive power	2,02	2,50	€/kvar, month
Distribution	0,32	0,40	c/kWh

ELECTRICITY TAX

Tax class I	2,25300	2,79372	c/kWh
Tax class II ¹⁾	0,70300	0,87172	c/kWh

TIME ZONES

In time-of-day distribution tariff, daytime electricity is valid on weekdays at 7–21 from Monday to Friday and at 7–18 on Saturdays. At other times nighttime electricity will be valid.

In seasonal distribution tariff, winter-day electricity distribution is valid on weekdays and Saturdays at 7–22 from 1 November to 31 March.

OTHER TERMS AND CONDITIONS

The prices are valid in Vantaa as from 1 January 2015. The Helsinki-Vantaa Airport has a separate network service price list.

General and time-of-day distribution are meant for customers with a main fuse of 100 A or smaller.

Seasonal distribution is meant for customers with a main fuse of 63 A or smaller.

Invoicing for power takes place separately for each metering point, based on the greatest hourly power measured during the past 12 months. The part of the monthly metered reactive power that exceeds half of the customer's active power invoiced at any given time shall be invoiced in connection with the network service.

The customer can choose the most appropriate network service product. The selection of the network service product is also affected by the voltage level of the electricity connection. The network service product is always specific for each metering point.

Change of a network service product is subject to a fee.

Effective electricity tax is added to the electricity distribution price of the network service.

¹⁾ to be applied in industry, greenhouse production and data centres in accordance with the guidelines by the Finnish Customs
