Symptoms caused by Listeria can be similar to flu, however, in rare cases, the infection can be more severe. Some people are more vulnerable to listeria infections, including those over 65 years, pregnant women and their unborn babies, babies less than one month old, and people with weakened immune systems.

**What you should do:**

- Check if you have purchased any of the affected dates.
- If you have had any cut cheese from us with the use by date on or before 14th April 2023 then please do not eat it and as it has already surpassed it's use by date. Please make sure you dispose of it safely.
- If you have any of this cheese left in stock, please isolate it for collection by us.
- Please let us know as soon as you have done this, confirming the weight of the cheese you have isolated. This will be credited to your account once we have received it.
- If you have been unwell after eating any of the affected cheese above, then please let us know.
