If you are concerned about the welfare of any registered racing greyhounds, please call our confidential Welfare Hotline on **020 7822 0917**. The line is available 24 hours a day, seven days a week.

You will be prompted to leave a voicemail message giving as much information as you can so that our team can investigate your concerns fully and ensure appropriate action is taken.

The Disciplinary Committee wish to advise those appearing before them as "the affected person" that the Disciplinary Committee has the discretion to take account of any previous breaches of the rule(s) of racing which they consider are relevant to a case being heard before them irrespective of the date of commission of the breach.

DISCIPLINARY COMMITTEE INQUIRIES

The Disciplinary Committee of the GBGB were in attendance at a meeting held on 11 May 2021

Those present:

Mr H Starte (in the chair)
Professor M Campbell
Mr R O'Donovan

1 Romford Stadium – LADY ESSEX – Professional Trainer Miss N McEllistrim

Professional Trainer Miss Norah McEllistrim was found in breach of rules 152(i), 174(i)(b) and 217 of the GBGB rules of racing in that a urine sample taken from the greyhound LADY ESSEX at Romford Stadium on 22 February 2021 was analysed by LGC Health Sciences as containing the presence of codeine, a substance that by its nature could affect the performance or prejudice the well-being of a greyhound.

Miss McEllistrim was in attendance. Mr Mark Arkell, Racing Manager at Romford Stadium, Stipendiary Stewards Mr Robbie Steward and Mrs Hayley Huntley and Professor Tim Morris, independent scientific adviser, were also in attendance.

The Committee heard that LADY ESSEX had run in a 400m Open Race at Romford Stadium on 22 February 2021, starting at 40/1 and finishing 4th. A pre-race urine sample was taken which on analysis by LGC Health Sciences ("LGC") tested positive as containing the presence of codeine and norcodeine, a metabolite of codeine.

Professor Morris told the Committee that codeine is available as a

veterinary medicine in combination with paracetamol for dogs but not for farm animals or horses. In combination with paracetamol it is a prescription only or pharmacist authorised only medicine for people. Codeine is a potent pain reliever which affects dogs as it does other animals and humans, suppressing pain and coughing and with a range of potentially serious side effects such as constipation and depression of breathing. In humans, it is also a drug of dependency if abused. It is a substance which by its nature could affect the performance or prejudice the wellbeing of a Greyhound.

Miss McEllistrim told the Local Inquiry held on 16 March 2021 that she had no idea where the codeine detected in LADY ESSEX could have come from and that she could only suggest that it had come from the meat that she fed to her greyhounds. Miss McEllistrim produced an invoice showing that she had been buying Category 3 beef mince for her greyhounds. She said she was not aware of any medical treatments being taken by herself or any kennel staff in contact with LADY ESSEX.

In his witness statement for the committee dated 24 March 2021, Professor Morris made clear that, because codeine or codeine in combination with paracetamol was not available for use in farm animals, it was extremely unlikely the codeine detected in the sample from LADY ESSEX had come from meat or anything else fed to LADY ESSEX.

The Committee heard that Stipendiary Steward Hayley Huntley had been instructed to visit Miss

McEllistrim's kennels to inspect what medications were on the premises and how they were kept. Mrs Huntley told the Committee that she made an unannounced visit on 20 April 2021. Miss McEllistrim left the kennels for a pre-arranged visit to a vet about 10 minutes after Mrs Huntley's arrival. Mrs Huntley then spent about an hour at the kennels making her inspection and talking with the two kennelhands. She had spoken with them during their lunch break in the kennel kitchen. As they spoke, she had seen one kennelhand get up from her seat and go to her bag, where she had taken a packet of medication from the bag. The kennelhand took two tablets from a blisterpack and returned to her seat with them in her hand. Mrs Huntley said the kennelhand had taken one tablet but fumbled and dropped the other tablet on the floor. She asked the kennelhand what the tablets were. The kennelhand said they were co-codamol painkillers and that she had been taking them for 20 years.

In a statement made on 4 May 2021 Miss McEllistrim said that the kennelhand had worked for her for more than 20 years. She had been taking co-codamol regularly through the day, every day since having surgery on her back about 15 years ago. Miss McEllistrim was sure the kennelhand had not deliberately given any tablet to LADY ESSEX. She loved the greyhounds and had devoted her life to them. But it could be a case of accidental contamination from a dropped tablet.

The Committee was told by Professor Morris that co-codamol is a combination of codeine and

paracetamol. Paracetamol had not been detected in the sample taken from LADY ESSEX. However, studies showed that paracetamol was excreted in the urine of humans and dogs in a relatively short period. He had found no studies of the excretion of codeine by dogs, but studies showed that in humans codeine was metabolised and excreted in urine over 2 days. Finding evidence of codeine but not of paracetamol was consistent with an administration of co-codamol and would not be “a total surprise”.

Miss McEllistrim told the Committee that she had known about the kennelhand taking painkilling tablets for years. She had simply not thought about it when asked at the Local Inquiry. She had only had one thought in her head, that the substance must have come from the meat. She had been very stressed and distracted at the time, after a difficult year during the pandemic, in which she had lost two friends. LADY ESSEX was a D3 racer that had started at 40/1 and was not a greyhound she was desperate to race. She had nothing to gain by giving her the painkiller.

The Committee observed that it was extraordinarily unlucky that the kennelhand had managed to inadvertently drop a tablet into the food being prepared for Miss McEllistrim’s greyhounds or somewhere else where LADY ESSEX had then eaten it. But the Committee found Miss McEllistrim to be an honest witness and could not find on the balance of probabilities that she had administered codeine or co-codamol to LADY ESSEX or knowingly allowed this to happen.

The Committee were glad to hear from Miss McEllistrim that all medications being taken by staff were now kept in her office at the kennel. The medication in this case had been a very potent medicine. No medications should be kept or taken in a kennel kitchen or anywhere where dogs could be exposed to them.

Because they impose strict liability, Miss McEllistrim was in breach of Rules 152 (i), 174 (i) (b) and 217. The Committee heard that Miss McEllistrim had a good disciplinary record prior to this matter. The penalty for these breaches was that she receive a caution and pay a fine of £200.

2 **Sheffield Stadium – SPEED ZONIC – Professional Trainer Mr Allen Lumb**

Professional Trainer Mr Allen Lumb was found in breach of rules 152(i), 174(i)(b) and 217 of the GBGB rules of racing in that a urine sample taken from the greyhound SPEED ZONIC at Sheffield Stadium on 23 November 2021 was analysed by LGC Health Sciences as containing the presence of mono hydroxylated and di-hydroxylated metabolites of stanozolol, a substance that by its nature could affect the performance and/or prejudice the well-being of a greyhound.

Mr Lumb was in attendance. Mr Richard Munton, Racing Manager at Sheffield Stadium, Mr Dave Perry, Authorised Representative, Mr Dave Baldwin, Stipendiary Steward, and Professor Tim Morris, independent scientific adviser, were also in attendance.

The Committee heard that SPEED ZONIC had run in a 500m A6 race at Sheffield Stadium on 23 November 2020, starting at 10/1 and finishing 4th. A pre-race urine sample was taken which on analysis by LGC Health Sciences (“LGC”) tested positive as containing the presence of metabolites of stanozolol.

Professor Morris told the Committee that stanozolol is an anabolic steroid that is not available as a veterinary medicine in the UK or Ireland. Its use in food producing animals is banned. In the UK stanozolol is a Class C Controlled Drug. Importing and possessing stanozolol is an offence in the UK and in Ireland. Any stanozolol administered in UK or Ireland will have been illegally imported and could also be of poor quality and even contaminated with other materials. As an anabolic steroid, the effects of stanozolol include muscle-building. Anabolic steroids also have many serious side effects. Stanozolol is a substance which by its nature could affect the performance or prejudice the well-being of a greyhound.

In his statement to the Local Inquiry held on 11 January 2021 and in evidence to the Committee, Mr Lumb said that in June and July 2020 he had been offered and then bought two sister bitches, SPEED THRILL and SPEED ZONIC from a trainer in Ireland, Mr Laurence Jones. He said he had first bought greyhounds from Mr Jones some 20 years ago but only to race on the flapping tracks, before he had become a GBGB trainer.

SPEED THRILL had arrived at Mr Lumb’s kennels in July. The greyhound was registered and had a POR sample taken at Sheffield and had then been entered in Mr Lumb’s kennel book on 25 July 2020. SPEED ZONIC arrived at his kennels about 13 August 2020 and was registered and had its POR sample taken on 18 August 2020. On 24 August 2020, SPEED THRILL had its first trial over 280m and ruptured a shoulder, an injury that meant it could not run again for 12 weeks.

The Committee heard that the POR sample taken from SPEED THRILL had screened positive for stanozolol, so that it should not have trialed on 24 August 2020. However, this positive result had not been reported to Sheffield Stadium or to Mr Lumb. A second POR sample taken from SPEED THRILL in December 2021 had also tested positive for the presence of stanozolol.

On 27 August 2020 LGC reported that the POR sample taken from SPEED ZONIC on 18 August 2020 had screened negative: no presence of stanozolol was detected. On 8 October 2020 a routine, pre-race sample was taken from SPEED ZONIC, which, on analysis by LGC, had also been screened as negative. However, the routine sample taken pre-race from SPEED ZONIC at Sheffield Stadium on 23 November 2020 had resulted in this referral to the Committee because, when screened by LGC, it was reported as testing positive for the presence of stanozolol.

The Committee heard that when LGC reported the positive finding for stanozolol from the sample taken on 23 November, Professor Morris had advised the Board to instruct them to review the results of the analysis performed on the POR sample taken from SPEED ZONIC on 18 August and the pre-race sample taken on 8 October. If the analysis of the POR sample or of both earlier samples did not indicate the presence of stanozolol, that would suggest the substance had been administered to SPEED ZONIC after it left Ireland and came into the charge of Mr Lumb.

In a statement to the Committee by Mr Simon Hudson, the Technical Director of the Sport and Specialised Analytical Services group of LGC, Mr Hudson gave his expert report on the analysis of the earlier samples. Reviewing the data from the POR sample taken on 18 August, Mr Hudson found that it showed a possible finding for stanozolol

metabolites which would correctly have been deemed at best a marginal finding. A clearer-cut screening finding could and should have been made on the data from the 8 October pre-race sample that it did contain what appeared to be metabolites of stanozolol (which finding would have been confirmed or not by further testing)

Mr Hudson concluded that there was strong evidence to suggest that stanozolol metabolites were present in the POR sample taken on 18 August and in the pre-race sample taken on 8 October and that the presence of stanozolol found in the pre-race sample taken on 23 November was due to administration of stanozolol to the greyhound before the POR sample was taken. This was supported by previous studies that demonstrated that stanozolol metabolites could be detected for at least 5 months after the anabolic steroid was injected.

Professor Morris explained that the normal pattern was for levels of detectable substances to rise quickly to a peak after the substance was administered, then to decline relatively quickly to a low level and then decline slowly to below the detectable level. With stanozolol, cases had shown that the level of metabolites could go up and down in the long tailing-off period, which period could last until 6 months and perhaps as long as a year after administration. He understood Mr Hudson's evidence to be that a very experienced person analysing the POR sample taken on 18 August could, with the benefit of hindsight, recognise indications of the presence of stanozolol metabolites from the data. Only the data from the sample taken on 23 November gave a clear indication of their presence, which then led to the further test which confirmed its presence.

Professor Morris said that despite being illegal, stanozolol had long been used in Ireland and continued to be used there not only as a suppressant in bitches but also for its muscle building properties. He considered the evidence, and pattern of previous findings of stanozolol, showed it was very likely the stanozolol detected in all three samples taken from SPEED ZONIC had been administered before the greyhound arrived at Mr Lumb's kennels.

Mr Lumb's evidence to the Local Inquiry and the Committee was that after SPEED THRILL was injured, Mr

Jones had sent him as a replacement a male greyhound called WHAZZIS. A few days after WHAZZIS arrived, Mr Jones had telephoned, telling Mr Lumb not to register him at Sheffield because he may have been injected with suppressant by mistake. Mr Lumb said that when he discovered SPEED THRILL's POR sample had tested positive for stanozolol and telephoned Mr Jones to tell him this, Mr Jones had said that both SPEED THRILL and SPEED ZONIC had been suppressed at the same time but that he had thought the substance would no longer be in their system when Mr Lumb got them. When Mr Lumb asked what WHAZZIS had been injected with, Mr Jones had replied that he had been away on holiday and left his dogs with a kennelhand who must have injected the dog by mistake. Mr Jones had told Mr Lumb that they were not allowed to inject racing dogs but were allowed to inject coursing dogs.

The Committee found that the stanozolol detected in the sample taken from SPEED ZONIC on 23 November 2020 was from an administration of the substance to that greyhound before the greyhound came into Mr Lumb's charge in August 2020 from the same trainer who supplied Mr Lumb with SPEED THRILL. It also accepted that when Mr Lumb raced SPEED ZONIC on 23 November 2020 he was not aware and had no reason to know that either greyhound had been injected with a suppressant or with stanozolol before he received them. Mr Lumb had been a victim in this affair.

Mr Lumb was in breach of Rules 174 (1) (b) and 217 and, in consequence, Rule 152 (j), because those Rules impose strict liability on trainers. The Committee was told that Mr Lumb had an exemplary record as a trainer before and since these inadvertent breaches. In those circumstances, the Committee ordered that there be no further action.

3 Henlow Stadium – PUCS PREMIUM – Ex-Greyhound Trainer Mr F Savill

Ex-Greyhound Trainer Mr Frank Savill was found in breach of rules 152(i), 174(i)(b) and 217 of the GBGB rules of racing in that a urine sample taken from the greyhound PUCS PREMIUM at Henlow Stadium on 18 June 2017 was analysed by LGC Health Sciences as containing the presence of meloxicam, a substance that by its nature could affect the performance

and/or prejudice the well-being of a greyhound.

Mr Savill did not attend. Stipendiary Steward Mrs Hayley Huntley and Professor Tim Morris, independent scientific adviser, were in attendance.

The Committee heard that the circumstances of this long delayed hearing were that the sample taken from PUCS PREMIUM on 18 June 2017 had been reported positive for the presence of meloxicam by LGC Health Sciences ("LGC") on 26 March 2018. However, serious ill health had meant that Mr Savill could not attend a Local Inquiry until 25 September 2019, when he had been able to attend that inquiry by it being held at his home. A hearing was further postponed pending introduction of the screening limit established by the meloxicam administration study conducted jointly by the GBGB and Greyhound Racing Victoria (Australia). Sadly Mr Savill's serious ill health had persisted. He had intended to attend the hearing by telephone but the Committee was informed on the day that he was too unwell to do so. He had asked the Committee to proceed in his absence.

Professor Morris told the Committee that meloxicam is a Non-Steroidal Anti-inflammatory drug that relieves pain, reduces fever and reduces inflammation. It is available in the UK as a licensed veterinary medicine in a range of tablet, liquid (for oral administration) and injectable forms for use in cats, dogs, horses, pigs and cattle. Like all NSAIDs it has the potential to induce adverse reactions, some of which can be life threatening. Vomiting is its most common adverse effect. Professor Morris was not aware of studies showing it could directly affect performance but its alleviation of symptoms could do so indirectly by mitigating the adverse effects of pain or inflammation. It was, in his opinion, a substance that could affect the performance or prejudice the well being of a Greyhound.

Mr Savill told the Local Inquiry that PUCS PREMIUM was not on medication at the time of the sample. But it shared a kennel with a greyhound, RED HOT DESERT, which had been receiving Loxicom® (a medication confirmed by Professor Morris to contain the NSAID meloxicam). Mr Savill suggested that the meloxicam detected in the sample from PUCS PREMIUM had come from it being given in RED HOT DESERT's food bowl or from eating RED HOT DESERT's vomit.

The Committee was shown photographs taken by Stipendiary Steward Hayley Huntley of the packaging of a 100ml bottle of Loxicom® liquid shown to her at Mr Savill's kennel, which was at his home. The prescribing directions on the box showed that Loxicom® had been prescribed on 12 June 2017 for RED HOT DESERT by Greyhound Sport Medicine, to be administered once a day with food from 13 June 2017.

Mrs Huntley told the Committee that Mr Savill's kennel had capacity for five dogs. Five dogs had been kept there when she had visited. There were two kennels shared by two dogs and a third, single dog kennel. Mr Savill prepared the dogs' food in his home kitchen. He had told her that with greyhounds that shared a kennel, he would put one dog's bowl of food in the paddock and take the dog out there to eat and give the other dog its bowl of food to eat in the kennel. Mrs Huntley said Mr Savill would not have had an empty kennel in which to isolate RED HOT DESERT when that greyhound was being treated for something and would not have wanted to put a dog from one of the other two kennels in with PUCS PREMIUM when the dogs had not been paired until then. Mrs Huntley said there was nothing in PUCS PREMIUM's racing form to indicate that it had been lame so that Mr Savill might have wanted to treat it with an NSAID.

Professor Morris told the Committee that the levels of meloxicam detected in the sample from PUCS PREMIUM were most likely from it receiving a clinical dose of the drug, no more than 36 hours before the sample was taken. This might have been administered in drops directly into the dog's mouth or the dog would have had to eat a whole dose put into a bowl of food.

For the Board, Director of Regulation Mr Mark Bird said it was accepted that it was unlikely that the drug had been deliberately administered to PUCS PREMIUM by Mr Savill. The more likely explanation was that he had inadvertently confused the dogs' bowls and given RED HOT DESERT's bowl of food, containing a dose of Loxicom, to PUCS PREMIUM.

The Committee agreed. Mr Savill was in breach of Rules 174 (i) (b) and 217 and in consequence Rule 152 (i), because those Rules impose strict liability on trainers. In the unusual and unhappy circumstances of this case, Mr Savill should receive a caution

for that breach but no fine or other penalty.

Open Races

General Conditions

Unless otherwise stated the following will apply to all open races advertised in this issue of the Calendar:

- The Standard Conditions of Entry (Rules of Racing, Rule 82) and international Entries and Conditions where applicable (Rule 83).
- Classification Wide Runners – Open Races (Rules of Racing, Rule 79(b)).
- Entries close to the Racing Managers, at the addresses of the stadiums concerned, at the times and on the date shown.
- The draw for traps (and heats, where applicable) is made under Rule 80 by the Secretary of the GBGB, or their appointed representative, as soon as possible after the closing date for entries unless otherwise indicated in the conditions.
- When reference is made in the calendar regarding greyhounds who have not won an open race at the time of closing, it refers to GBGB open races.

Akay's gunning for glory

Akay Party Seven, in pole position to take the BSI Cournamitch Trail

AKAY Party Seven can hold two more guns for the opportunity to hold the title of Irish Oaks winner over their rivals at Mullingar on Sunday.

The Cournamitch Trail is responsible for the fastest time taken in the event and is scheduled to start on Saturday at 8pm and to finish at 12pm on Sunday.

The Cournamitch Trail is the longest and most difficult of the three trails and is the most popular. It is the longest and most difficult of the three trails and is the most popular. It is the longest and most difficult of the three trails and is the most popular.

PRODUCE HEATS ON SATURDAY
