BUNDESDRUCKEREI

40% shareholder

- **Revenue (Group):** € 550m in 2019
- **Employees:** > 2.000
- Founded in 1879

What is needed in order to bring travelers back to Airports?

What is needed to bring travelers back to airports?

Self Service

Touchless

Self Service and Touchless Travel Procedures is what will bring travelers back to airports

One more thing is needed; Your Mobile!

After COVID

Before COVID

Previously, you needed
only your passport and
ticket

Now, you need also your mobile

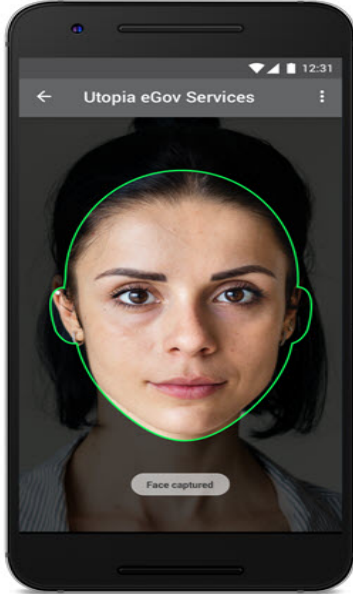

At COVID Times, what is the digital kit

For the Traveler?

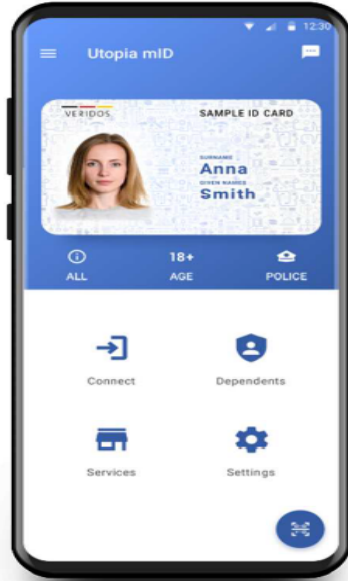

For the Airports?

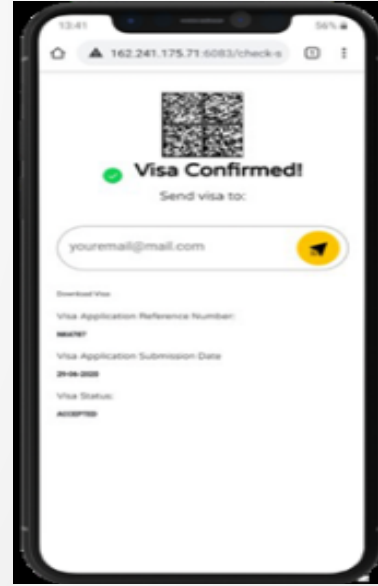

TrueID

On-Mobile eGov Portal, used to verify citizens using their face so they can access eGov Services.

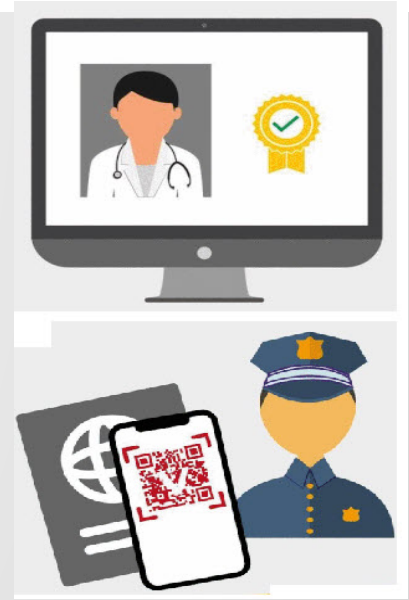

Digital ID

This is a digital ID solution. Digital ID can be a national ID, Driving License, or any ID.

SmartTravel

Visa management is digitalized. Citizen use their mobile to apply for eVisa and to present eVisa to Authorities.

TrueSeal

Used to issue secure, government-attested and universally accepted certificates.

"Veridos Leads 2 EU Commission Funded Projects: EU Protect & D4FLY"

EU Protect project aims at enhancing the border crossing experience using a mobile and the face of the passenger

This Veridos-led project, called D4FLY, focuses on the authentication of travelers on the move and document verification with the primary goal of making border control faster and more secure

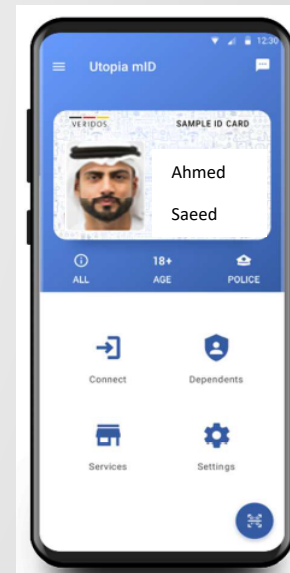

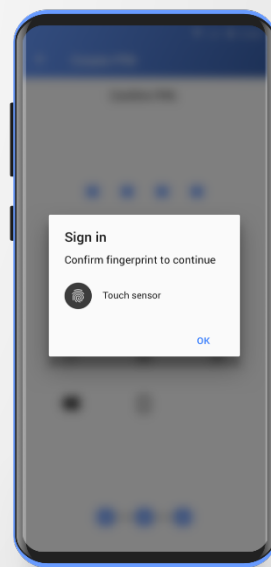

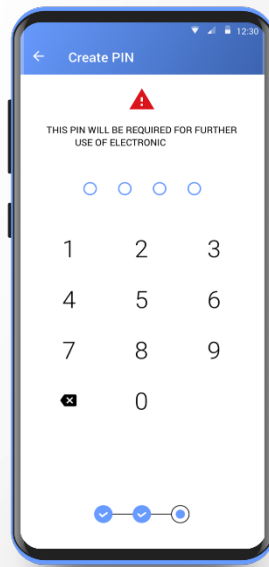

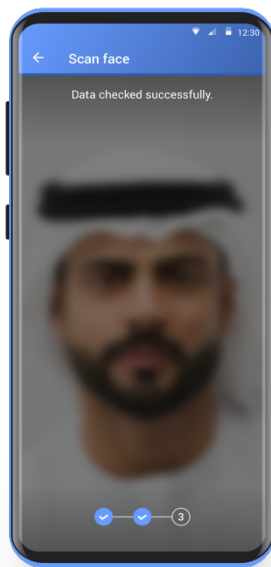

EU Protect and D4FLY Teams

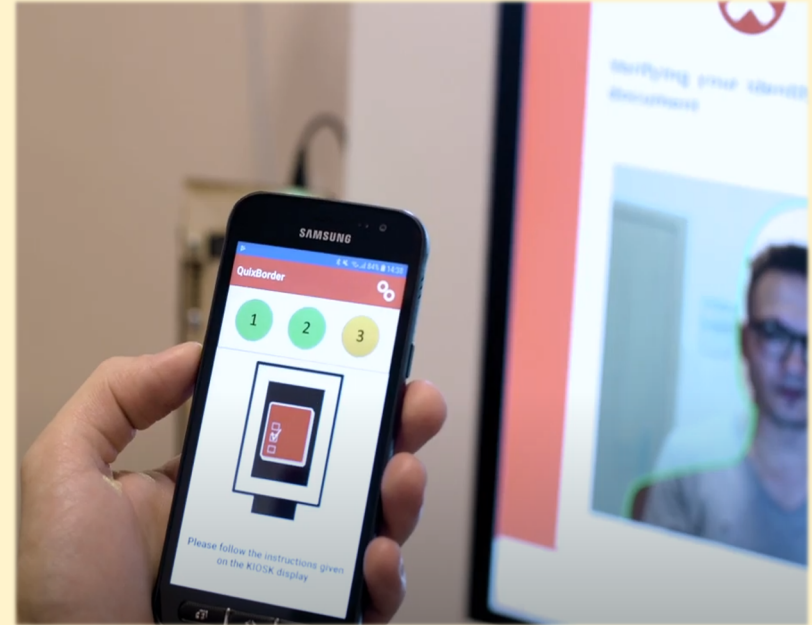

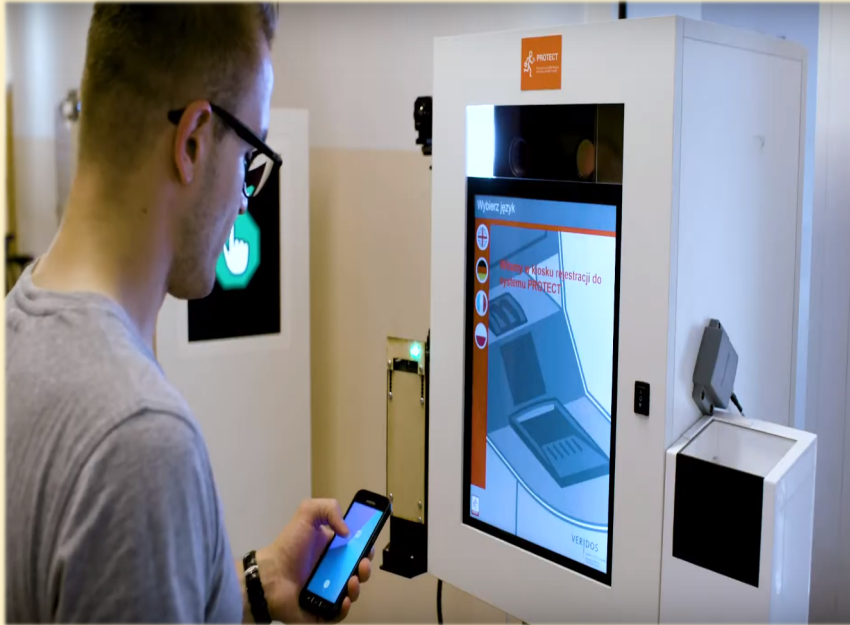

European
Commission

How do the digital kits work in real life?

At the Airport – Acquiring Travel Credentials

At the airport – Crossing the Corridor

Thank You!
