Master ABAP! Get comfortable with language basics using our beginner’s guide. Once you’ve grasped the fundamentals, pick up our complete reference, perfect for your day-to-day ABAP needs. Enhance your expertise by understanding the latest and greatest ABAP innovations and preparing yourself for the future of ABAP programming!

ABAP An Introduction
Take your first steps in ABAP with this beginner’s guide! Learn ABAP syntax and add logic to your apps. Work with the ABAP data dictionary, create database objects, and process and store data. Round out your skill set by practicing error handling, and more.

ABAP RESTful Programming Model
You’ve worked with ABAP, SAP Fiori, and OData—now see how these technologies and more come together in the ABAP RESTful programming model! Build on your expertise to create cloud-ready applications for SAP S/4HANA and deploy applications to the SAP Fiori launchpad. Manage applications with Git version control, automated testing, and continuous integration. Make the new model work for you!

ABAP Programming Model for SAP Fiori
Combine your skills in ABAP, SAP Fiori, core data services, and more to master the end-to-end development process for SAP S/4HANA applications. Learn to use the ABAP programming model for SAP Fiori to build applications from scratch, or use SAP Fiori elements to get a head start! Then, deploy your applications to SAP Fiori launchpad and get the best practices you need to operate applications post-development, including Git version control, application tests, and setting up an integration pipeline.

ABAP to the Future
Learn what’s new with the latest ABAP releases—7.52 and 1809—and see what other SAP technologies are now bringing to the table. Learn about abapGit and transporting objects between systems. ABAP SOL, the RESTful ABAP programming model, and test tools for core data services, SAPUI5, and Web Dynpro ABAP. Stay on the cutting edge!

ABAP Development for SAP HANA
Understand how SAP HANA changes ABAP programming for even the most experienced developers. Enable code pushdown to move code from the application server to the database. Get up to speed on the SAP HANA development environment.

SAP Fiori Implementation and Development
Implement SAP Fiori on AS ABAP, SAP HANA, and SAP S/4HANA. Customize transactional, analytical, and fact sheet apps. Upgrade to SAP Fiori 2.0 and develop your own apps from scratch.

SAP Fiori Associate Certification Guide
Learn about the SAP Fiori certification test structure and how to prepare. Review the key topics covered in each portion of your exam. Test your knowledge with practice questions and answers.

Winfried Schwarzmüller
Test-Driven Development with ABAP Objects
Use test-driven and agile development to write more robust ABAP programs. Clean up new and legacy code, minimize dependencies, and improve development efficiency. Create integration tests, component tests, and more.
