bozmantate@sky.com

I am a Freelance Dubbing Mixer with over 10 years of experience across a broad range of TV genres. I have developed excellent customer/client relationship skills and have a very strong technical background. I also advise people on Broadcast Technology and can help to create refined workflows and solutions within Production and Post Production.

I have a studio environment set up at home (Pro Tools 12HD) for remote tracklaying/mixing and reverberation work which, along with a fast fibre channel connection, makes an attractive alternative to juggling too many bookings with not enough Dubbing Suites.

Employment

Silverglade Post Production

Senior Dubbing Mixer : August 2005 – March 2015

As Senior Dubbing Mixer I held sole responsibility for the Audio Department at Silverglade. This included all Tracklaying, Mixing and Voice-Over recording for several years. I took on and trained an assistant Dubbing Mixer in 2012 to cope with the increasing bookings.

I have had the pleasure of working with some great production companies on a broad spectrum of material, each with its own set of challenges, which has taught me the necessity to evaluate each job according to Budget and Expectation (or to find a happy medium between the two!). However this cannot hide the fact that i am a perfectionist at heart and as such i am willing to go the extra mile to achieve a better product.

A full Broadcast Credits list is available upon request.

I have been involved with all technical and maintenance work at Silverglade since changing the facility from Analogue to Digital SD/HD Tape formats in 2006, to creating a truly seamless HD file-based workflow with remote collaboration tools from Avid Interplay/Avid Everywhere solutions.

In 2012 i played a key role in the refurbishment of the whole facility and helped to design and build 2 new 5.1 Dubbing Suites and a Voice-Over Booth running Pro Tools 11HD on ISIS/Interplay with Avid S6 desks and Native HD Projection.

I have spent a lot of time and effort in teaching 'New Technology' (Avid/Interplay/Content Agent/Harding) to 'New People' (Edit Assistants/Editors) and helping to keep a current knowledge-base of formats and best practices in order to optimise and refine everyday workflows. This has helped me to gain a good all round understanding of Post Production and its future direction.

Crow TV

Dubbing Mixer : August 2004 – August 2005

I joined Crow TV as a Sound Assistant which mainly involved Tracklaying/Prepping and recording Voice-Over sessions. After a few months i started mixing on shows such as MTV Cribs, Cash In The Attic and Mum's On Strike. I was also responsible for laying back to Digibeta, DA-88 and performing QC's.

De Wolfe Music

Mastering Engineer : August 2000 – August 2004

Most of the work involved transferring and mastering the company's extensive library of ¼" tape into a SADiE 4 System using Studer Reel-to-Reel and Dolby NR. Also creating new compilation CD's of recently recorded library tracks for DDP master duplication. All music was subsequently edited for commercial lengths and stings. I was also involved in the creation of their hard disk based Harmony Search system and similarly the web based search/preview facilities.

Skills

I consider myself to be a fluid Pro Tools Dubbing Mixer with clear insight of 'End to End' Broadcast Technical Delivery and my skills include :

- Mixing for DPP Broadcast Standard (EBU R-128) (Stereo and 5.1)
- Tracklaying and Sound Design
- Voice Over Recording
- International Reversioning and Deliverables

I also have an in depth knowledge of :

- Post Production Workflow Creation/Refinement
- MCR Setup/Operation/Maintenance
- Edit Support/Technician
- Network Installation/Support
- IT Installation/Support
