

15 PhD POSITIONS AVAILABLE

INITIATE is an Innovative Training Network funded under the Marie Curie actions of the European Commission. The consortium brings together world leaders in virology, inflammation, innate immunity and immunometabolism with the aim to educate a new generation of research scientists in the emerging research field of Antiviral Immuno Metabolism.

The consortium is now recruiting 15 PhD students – Early Stage Researchers (ESRs), each performing an individual research project at one of the partners.

We are looking for talented and highly motivated early career researchers educated in biology, infection & immunity, biochemistry or related subjects and experience in cellular biology, (bio)chemistry, immunology and/or virology. We expect dedication and enthusiasm for experimental research, combined with scientific curiosity and the capacity to teamwork in an interdisciplinary environment.

Positions are open from August 1st 2019, until the positions are filled (at the latest January 1st 2020) and ESRs will be based in the Netherlands, Ireland, Norway, Sweden, Austria, France or Italy.
