D-CODE

D-Code upgrades your everyday! That is precisely the reason Sieger design has taken the straightforward, unpretentious design of the original D-Code series and developed it further. The result is a complete range of bathroom products with distinctive ceramics and a diverse array of furniture, allowing you to furnish a wide variety of spaces.

Attractive and functional solutions for the washbasin area can be created by combining D-Code washbasin and countertop combinations with vanities in modern, easy-care colours and wood decors in all standard sizes. The straightforward furniture handles, with recessed grips milled in from below are just as visually understated as the slender faucets with their balanced proportions. In addition, all furniture elements come from sustainable, PEFC certified production in Germany and come pre-assembled and adjusted so installation is quick and convenient.

The D-Code range is complemented by a semi-tall cabinet as well as an illuminated mirror and mirror cabinet. You can create a bathroom with a cohesive design by combining these items with faucets and accessories from the same range. The toilets come standard with Duravit Rimless®, where the open design of the rim produces an innovative and efficient flow of water. A dynamic and powerful flush that creates a horizontal circle before the water flows down vertically, thoroughly rinsing the entire surface of the bowl. This guarantees an ideal and hygienically perfect flush every time, even with only a small amount of water.

Bathtubs in particular create a unique sense of relaxation and comfort. D-Code offers a comprehensive range of rectangular, back-to-wall acrylic bathtubs in a new elegant design and in all standard sizes. With an inner depth of about 45cm, they offer an extremely comfortable bathing experience.

DC1043002046 - Matt Black	£418.80

A flow restrictor limits the flow rate from the outset. This decreases consumption significantly. At 3.5 litres per minute, MinusFlow faucets use 40% less water than standard faucets.

Duravit FreshStart faucets provide full control over hot water consumption, effectively reducing energy needs in everyday life. Only cold water is allowed to flow when the lever is in the middle position. For hot water, it has to be actively turned left. This way, water is heated only when it's really needed.

D-Code bathtubs offer a sleek 1-inch (25 mm) edge for a modern accent. Choose from various shapes and sizes — including corner and hexagonal models — with depths of 15 or 18 inches (39 or 45 cm) to suit your space. Available with either a foot-end or central drain, the latter keeps the standing area clear when showering, and the smooth acrylic finish ensures easy cleaning.

NO.1

With the in-house design of our Duravit No.1 complete bathroom series, Duravit has created a high-quality upgrade for everyday use. This is a bathroom where you can recharge your batteries, prepare for the big challenges of the day, or relax and spend time with loved ones.

The narrow rim of the Duravit No.1 sink allows for plenty of usable space in the inner basin, which is big enough that you can easily wash your hair in it, for example. The basic shape of the rectangular sink is unusual in this price segment. The large tap hole platform offers plenty of space to store all your everyday bathroom items. A highlight of the clear and modern Duravit No.1 design is the way the sink overhangs slightly from vanity. The ceramics are available as stand-alone sinks, vanity sinks, semi-recessed and fully recessed sinks and as hand sinks. Available with or without a vanity, they offer the perfect solution for the washing area in any bathroom, from small powder rooms to large family bathrooms.

Duravit No.1 vanity cabinets and semi-tall cabinets come with built-in recessed grips that make them simple and convenient to open and close. Dirt doesn't accumulate on the seamless fronts, which are free of edges or gaps so they are extremely easy to clean. The vanities are optionally available with internal drawers and with optional interior dividers. This keeps the interior neat and well organized and allows you to find small items quickly.

The range of Duravit No.1 bathroom faucets is harmoniously balanced and includes sink faucets, bidet faucets, shower faucets and tub faucets. With the dynamic handle that points upward, the faucet fits comfortably in the hand and underscores the high quality of the look. Duravit No.1 faucets make a perfect match when combined with the Duravit No.1 sink.

For the toilets in the series, Duravit uses the innovative Duravit Rimless® flushing technology, to which you can optionally add our HygieneGlaze ceramic finish to inhibit the growth of bacteria. This makes Duravit No.1 products particularly hygienic and easy to clean. Another highlight in this price segment is the trapezoid-shaped built-in bath made of sanitary acrylic. The tub is also available in a rectangular shape as an alternative. The Duravit No.1 bathtub is also available in smaller sizes, even with a trapezoid shape, making ample bathing space for two possible even in smaller bathrooms.

DURAPOINT

Attractive and functional solutions can be created with the DuraPoint Series. The wall-hung DuraPoint vanity units are equipped with two drawers that offer a high load capacity (up to 30 kg) and can be fully extended and therefore offer plenty of practical storage space. The convenient soft-closing mechanism ensures that the drawers close smoothly. The furniture has two full-length handles in matt black for easy opening and closing of the drawers.

The vanity unit is carefully handcrafted entirely in Germany using state-of-the-art technology and meets the highest quality standards. The base material used for the vanity unit is proven to come from ecologically, economically and socially sustainable forestry (PEFC seal (PEFC/04-31-2357)).

The matching DuraPoint furniture washbasin made of cast mineral ensures a minimalist look. The cast mineral material is characterized by its pleasant feel – it is velvety and warm to the touch. The surface is free of pores and joints, which makes it easy to clean. Alternatively, round or square washbowls are also available to suit DuraPoint – available in a range of size options, in 2 colours to give you the flexibility of choice, dependent upon your requirements.

DURASTYLE

DuraStyle works well everywhere it's used: The complete program offers an equally extensive range for individual homes as it does for major projects. With its extensive product range, DuraStyle opens up even more options for individual bathroom design.

The combination of an understated design language with high functionality is also evident when it comes to DuraStyle toilets. The flat lid/seat combination, available with or without a slow-close function, is strikingly elegant. Toilets are available in wall-mounted, free-standing or back-to-wall versions and are equipped with the innovative Duravit Rimless® flushing technology, with concealed or open fastenings. We offer a broad range of products, suitable for practically every situation and almost all architectural conditions.
