C-Lenda

Whirlpool Systems

The C-Lenda Whirlpool system is the most technologically advanced system available on today's market. This unique jet system has been designed by Markon in New Zealand and ensures the most comfortable bathing experience. Almost all baths in the Carron range are compatible with this whirlpool system and are made to order by our skilled technicians at our factory in Falkirk.

In previous whirlpool baths, the fittings protruded from the bath wall into the bathing area and were prone to build up of soap which was difficult to clean. In the unique C-Lenda design, all fittings are flush with the bath wall, creating a smooth, continuous surface.

Panels

We offer a range of panels to complete the look of your chosen bath. One piece L-Shaped panels provide the ideal solution, ensuring a flawless finish and removing any unsightly joins between front and end panels. Where an L-Shaped Panel is not suitable, standard front and end panels are also available.

All front and end panels can be purchased in standard or Carronite finishes.
