BATHROOMS

STYLISH BATHROOMS FOR EVERYBODY

Accessible & beautiful bathrooms, for all.

At Ideal Standard, we've been creating bathrooms for many years with the aim of ensuring beauty and accessibility, is available to all.

Scan the QR code
or visit **idealspec.co.uk**

At Ideal Bathrooms, we've joined forces with industry leading brands to ensure that creating an accessible bathroom is as straightforward as it is reassuring.

Our multi-generational approach means every design is conceived to serve households of all ages and abilities, honouring dignity and autonomy at every life stage. We believe that independent living should never demand a compromise on style, which is why our collections feature contemporary finishes and thoughtfully integrated support solutions that complement your home.

From initial concept through to installation, our dedication is to deliver innovative, elegant bathroom environments that enhance comfort, confidence and peace of mind.

Contents

04 Style within assisted living

Thinking about adapting your bathroom? The great news is that it can look beautifully designed and anything but clinical!

06 The benefits of walk-in baths

Whilst many people love the luxury of soaking in the bath, getting in and out is not always easy! Investing in a walk-in bath is a long-term benefit for your independence and dignity.

08 Showering

There's nothing like a refreshing shower, and that shouldn't need to change if your mobility or flexibility is reduced.

10 Toilets

Toilets are an essential and basic necessity, and are one of the most crucial elements to get right in your home if you are experiencing any difficulties with mobility.

Style within Assisted Living: Creating Beautiful, Accessible Bathrooms

Thinking about adapting your bathroom? The great news is that to make it easier to use it can also look beautifully designed and anything but clinical!

Modern, stylish finishes can be achieved with inclusively-designed products, so there's a bath, shower, toilet and sink, plus all the accessories, available for you to choose the bathroom you want, in a style you love.

And if you or a member of your family is getting a little older, a bit less agile, or has developed a disability, if you are wanting to stay in your forever-home now is the time to consider future-proofing it.

Plus it's worth remembering that an assisted living bathroom can benefit every user - expectant mums, a teenager with a leg injury, small children who cannot climb over the side of the bath - accessibility means inclusivity.

“ Our range of bathroom fixtures and fittings mean that whatever your accessibility requirement you can be assured of beautiful design and no compromise on style! ”

Will Hickman, Sales and Marketing Director, Ideal Bathrooms

Go for bold contrast, like pale tiles with black accessories such as grab rails to help with visual problems

So what are the options?

Limited mobility doesn't mean an end to getting in the bath, we have beautiful walk-in baths that allow low-threshold access. In-shower seats allow you to wash whilst sitting comfortably, and attractive support rails add extra security all around.

Raised height toilets are perfect for anyone who has difficulty getting up, and shower toilets, which can wash and dry, are an amazing all-in-one solution, whilst fitting in stylishly with your designs.

There are myriad solutions to allow you to continue enjoying your bathroom, independently, for years to come.

Any other hints?

If a member of your family has or is developing visual problems, go for bold contrast, like pale tiles with black accessories such as grab rails. It is possible to put a border around the base or edge of sinks and toilets too, which look like a contemporary design feature but act as a focus point.

Keep flooring simple, and remove trip hazards such as rugs. Slip-resistant vinyl is ideal, and some new laminates and LVT are now suitable for bathrooms too, which gives you a huge choice.

When choosing taps consider a mixer which offers better temperature control to avoid scalding, and think about lever or cross-head controls which are easier to use for those with limited dexterity. Pop-up drains too are simpler to open and close when filling the basin or bath.

Large format tiles will have fewer grout lines to keep clean, or maybe consider wall panels which are easy to wipe down.

Bathrooms tend to be very brightly lit, but to some people high levels of reflection can be disturbing. In this case opt for bulbs that are bright but warm.

And for night-time visits to the bathroom, consider the addition of low level lighting which comes on automatically as you enter the room.

It's a great safety feature, whilst adding that luxury hotel touch.

The Benefits of Walk-in baths

View the full range

Whilst many people love the luxury of soaking in the bath, getting in and out is not always easy! Investing in a walk-in bath is a long-term benefit for your independence and dignity.

You can eliminate most of the risks with one of our walk-in models; their low threshold doors mean stepping in requires less effort and is therefore much safer.

They fit into the same area as a standard bath so replacing your current model is simple.

You don't need to get rid of your over-bath shower; some walk-in baths incorporate seats which also allow for sit-down showering so are multi-functional as they adapt with your needs.

Our walk-in baths are also available in 'P' shape and 'L' shape which are wider at the shower end and have slip resistant surface to make showering safer. And for use with over-bath showers we have a range of screens, for every shaped bath.

They fit into the same area as a standard bath so replacing your current model is simple

Stylishly Safe...

Solidity is essential; our baths have encapsulated baseboard routed and shaped to cover the full base of the bath including around the plug hole, so there's no movement.

An anti-slip base reduces the fall risk, so always look at the specification to ensure you have the required level of this essential feature in the walk-in bath you choose, especially if it is to also be used as a shower.

Grab rails add a steadying assurance when getting in and out of your bath, and their inclusion in your designs doesn't mean you miss out on style!

We supply a fantastic range of rails in a choice of finishes, colours, and materials that will enhance your decor – and your safety.

How does it work?

The low threshold toughened glass door opens fully to allow you to step in, and features a simple to operate locking system, so once closed there's no worry about water leaks during use.

What other features should I consider?

We have a walk-in bath to suit you!

Do you want a hinged folding seat?

An integrated shower seat or neck support?

How about twin waste for quicker drainage which reduces your waiting time?

“Bathe Easy is where accessibility meets elegance. We know that physical limitations shouldn't mean compromising on style or safety. Our innovative designs seamlessly blend functional accessibility with contemporary bathroom aesthetics, ensuring your space remains both practical and beautiful.”

Trojan

What about other family members?

Both the bath and the over-bath shower can be used without the accessible elements causing any restrictions – in fact you may find the seat and other options will be very popular with everyone!

Showering

There's nothing like a refreshing shower, and that shouldn't need to change if your mobility or flexibility is reduced.

With our superb range of anti-slip shower trays, plus helpful accessories including shower seats and support rails in contemporary designs and colourways, your new shower will be both stylish and safe.

Safety first

Slips and falls, especially on wet soapy surfaces, can occur only too easily, so the incorporation of an anti-slip or slip resistant surface is essential when choosing your shower tray.

Low-level or flat shower tray profiles mean there's no big step to negotiate when getting in and out, and grab rails or support bars keep you steady.

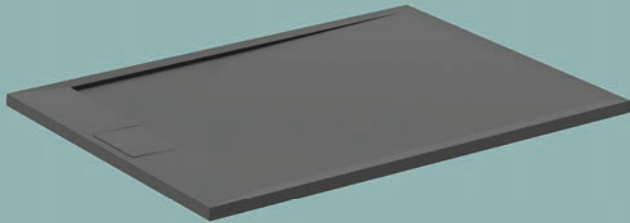

The size of your shower depends on the space available in your bathroom, but going as large as possible allows for the incorporation of a shower seat, which can be stand-alone or wall-mounted.

“What our customers love best about JT's Naturals range is the inherent anti-slip surface of the tray, which offers incredible performance whilst uncompromising on the aesthetic of the sleek slate effect surface.”

Dan Banks, Sales & Marketing Director,
Just Trays Ltd

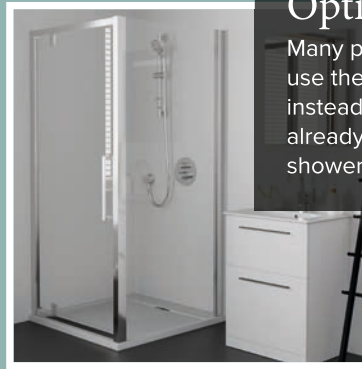

Shaping up

Our shower trays come in every size, and are square, rectangular and curved (quadrant), and in a variety of colours, so will fit whatever your bathroom space and your design dreams dictate.

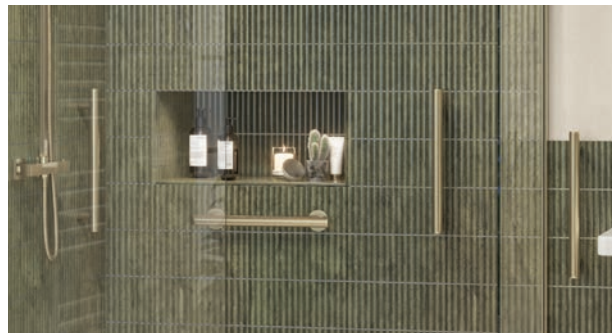

Optimal floor space

Many people opt to remove their bath and use the floor space to install a luxury shower instead. With the water inlets and drain already in place, plumbing-in the new shower here is not necessarily a big task.

Anti-slip technology

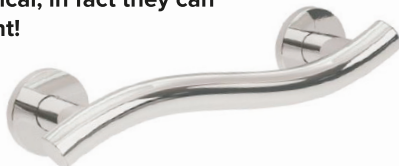

Incorporated in the shower tray coating reduces your risk of slipping on the wet soapy surface. Always check the specification to ensure you have this essential feature in the shower tray you choose.

Rails & Supports

Grab rails and wall-mounted supports are a great way to achieve an added sense of security both outside and inside the shower.

We supply classic and contemporary designs, in a variety of colours and finishes, so they'll look anything but clinical, in fact they can become the focal point!

Take a seat

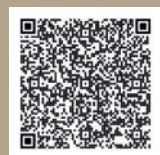

Shower seats allow you to stay in the shower longer if you cannot stand for prolonged periods, and can also make washing your feet a lot easier!

They can be padded for extra comfort, have arms or a backrest for even more stability, and combine aesthetics and functional design in many finishes;

From easy clean white plastic to teak-slatted for a designer hotel vibe.

Toilets are an essential and basic necessity, and are one of the most crucial elements to get right in your home if you are experiencing any difficulties with mobility. If you need assistance in accessing or using your toilet, do not worry – there are a lot of options available and we are here to help!

**New designs and innovations
mean that you can make
adaptations to continue to use
your current toilet**

Or replace it with a comfort height toilet, or even change this for a wash and dry model.

Toilets

It's known as the smallest
room, but it's also the most
important room!

Style AND substance

Shower toilets are an ideal solution for multi-generational households, where people of different ages and physical needs share the same bathroom. They offer a combination of hygiene, comfort, and accessibility that supports the wellbeing of every family member – from children to older adults.

One of the key benefits of shower toilets is their superior hygiene. Instead of relying solely on toilet paper, these toilets use a gentle stream of warm water to clean, promoting better personal cleanliness and reducing irritation, especially for those with sensitive skin or mobility issues. This is particularly beneficial in households with elderly individuals or those recovering from surgery, where ease of use and hygiene are critical.

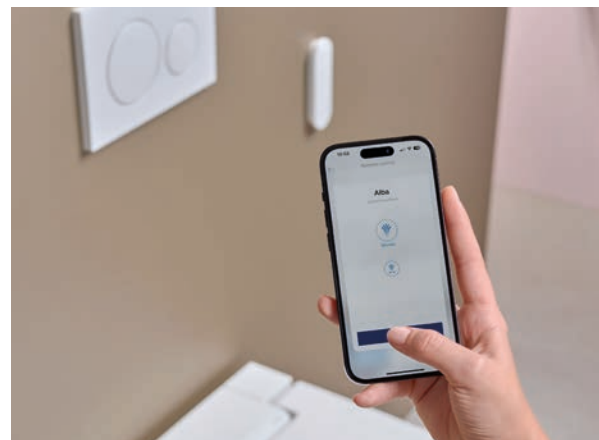

Height adjustability is another important feature that can allow your shower toilet to be well-suited for multi-generational living. This can be done by installing your Shower Toilet onto installation frames such as the Geberit DuoFix. This allows the WC pan height to be modified according to the needs of each user, improving safety and comfort, at first fix installation phase.

“When customers see AquaClean shower toilets they are amazed! They offer the ultimate hygiene solution for anyone with limited mobility and are a real boost to independence.”

Geberit UK

The Geberit AquaClean line of shower toilets combines elegant design with advanced features like a heated seat, odour extraction, and warm air drying. These features not only enhance comfort but also provide greater independence, especially for users who may otherwise require assistance. Remote controls or smartphone apps can be used to customize settings for different users, making shared use intuitive and seamless.

Incorporating a shower toilet into a multi-generational home is a smart investment in long-term comfort, hygiene, and accessibility. With solutions like Geberit AquaClean, families can enjoy the benefits of modern bathroom technology tailored to the diverse needs of all generations.

The Geberit Home app lets users adjust shower toilet settings, access remote troubleshooting, and manage maintenance – offering personalized comfort and support for all household members.

Choosing an illuminated mirror will help to enlarge even the smallest of spaces, reflecting light around the room and brightening your day. Many of our mirrors have an inferred on/off switch which lets you activate the lighting without even touching your mirror. Simply move your hand in front of the sensor to activate.

VAT Exemption

on Independent Living Bathroom Products

When choosing bathroom products to make your daily routine more comfortable you need to ask are they effective, do they look good, and how much will they cost?

Significant savings can be made when you take advantage of the VAT exemptions; 5% on many products for the over 60s, and the full 20% for those with qualifying disabilities. Choose a reputable provider that can advise you of the tax implications. When you browse our range of beautifully designed and solidly crafted bathrooms, fittings, and accessories you can be confident you'll be getting the best products and the correct advice.

If you're disabled or have a long-term illness, you will not be charged VAT on products designed or adapted for your own personal or domestic use. Additionally, you will not be charged VAT on the installation and any extra work needed as part of this, but both the product and your disability have to qualify.

Which conditions apply?

For VAT purposes, you're disabled or have a long-term illness if you have a physical or mental impairment that affects your ability to carry out everyday activities, for example, cerebral palsy, spinal cord injury, muscular dystrophy, blindness, deafness, and learning disability, you have a condition that's treated as chronic sickness, like diabetes or arthritis, or you have terminal conditions such as motor neurone disease, or some cancers and heart disease.

You do not qualify if you're elderly but not disabled, or if you're temporarily disabled, e.g. a broken leg. However if you are aged over 60 you can benefit from reduced rate VAT on mobility equipment, currently 5% rather than 20%.

And to be exempt from VAT, the product needs to be solely designed or adapted for a disability, not just a product that's helpful to people with a disability.

So what products qualify?

VAT is exempt with qualifying disabilities if you have a new bathroom, washroom, or lavatory installed, or extend or adapt an existing one to assist with your disability. This can include replacing your bath with a shower or walk-in bath, installing a ground-floor bathroom, or altering an existing bathroom for wheelchair access.

For people aged over 60 you can benefit from a 5% reduced rate VAT on mobility equipment, which includes grab rails, bath lifts, built-in shower seats, or showers containing built-in shower seats, and walk-in baths with sealable doors. It's important to recognise that you need to have the equipment installed by the supplier – 'supply only' does not qualify for the VAT reduction.

Remember when choosing your new bathroom fixtures, fittings, and accessories that you need to declare your VAT exemption status before you buy, it is not a retrospective repayment.

It is also worth knowing that grants to adapt your bathroom may be available from your local authority, Care & Repair, DFG (Disabled Facilities Grant) and Adapt My Home.

What do I do next?

Take the first steps to future-proofing your bathroom now; explore our full range of independent living solutions, and speak with one of our specialist advisors to confirm your VAT exemption eligibility.

“ Many clients were not aware that savings can be made when you take advantage of the VAT exemptions; that’s 5% on many products for the over 60s, and the full 20% for those with qualifying disabilities. ”
