80001764

iCON™ Chrome Cover Fitting Instruction

For all iCON 15L Fans with or without a module

⚠ **Important:** All electrical installations and adjustments must be performed by a qualified professional in compliance with UK Building Regulations or applicable local regulations.

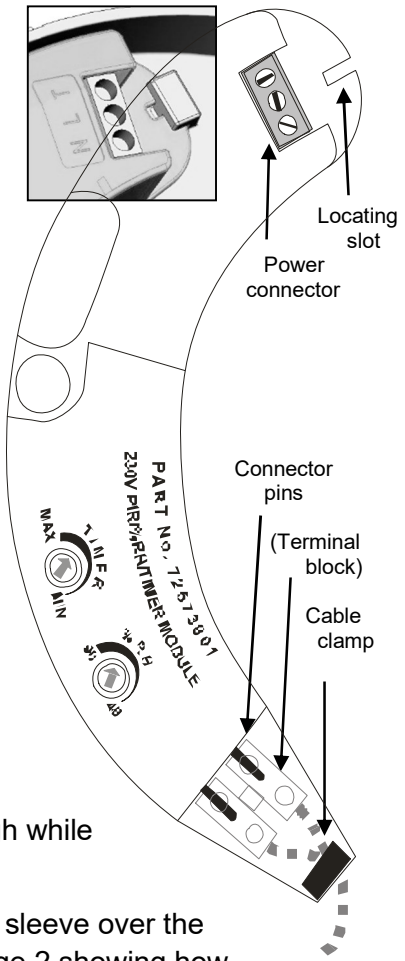

SAFETY FIRST: ALWAYS ISOLATE THE iCON 15 UNIT FROM THE POWER SUPPLY BEFORE REMOVING THE COVER.

⚠ Chrome Cover Safety Notice

To ensure safe and compliant installation of the chrome cover, follow the procedure below. Failure to fit double insulated mains wiring or an insulation sleeve may result in electric shock or injury. Airflow accepts no liability if the recommended steps are not followed.

⚠ **Important:** The mains cable **must** be double insulated to be properly installed.

🛠 Fitting & Wiring Instructions

1. **Remove the front cover**
   Refer to the iCON 15 instructions.
   If a module is being used with the fan, proceed to steps 2–4.
   Otherwise, skip to step 5.

2. **Connect the module**
   Lift the terminal block away from the fan housing.
   Push the two connector pins at one end of the module into the electrical terminal block and tighten using a suitable screwdriver.
   Ensure the leads are secured under the retaining clip.

3. **Fit the module**
   Insert the slotted end of the power connector into the Locating slot in the fan housing.

4. **Secure the module**
   Push the module back into the fan body, ensuring the terminal block locates over the two retaining pillars.

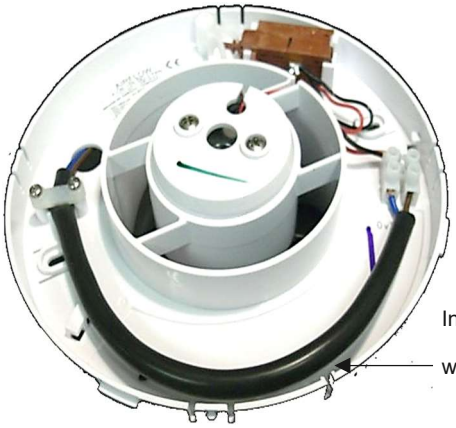

5. **Connect the mains cable**

   - Fix the sealed grommet (supplied) into the cable entry hole.
   - Pierce the grommet to allow the mains cable to pass through while maintaining the seal.
   - Use double-insulated mains wiring, or provide an insulation sleeve over the wiring and fit it securely over the mains cables. Refer to Page 2 showing how a rubber sleeve arrangement is used on fans with and without modules.
   - Connect the cable to the 3-way power connector block.
     Refer to the iCON 15 instructions for wiring schemes.

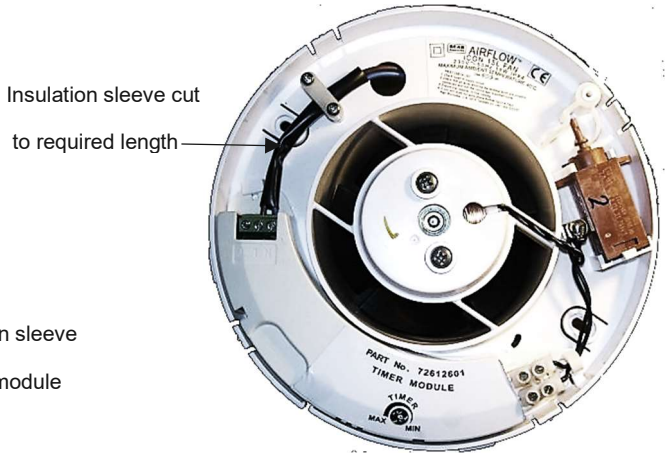

- Ensure the supplied cable clamp is fitted.

6. **Refit the front cover**
   Refer to the iCON 15 instructions.
