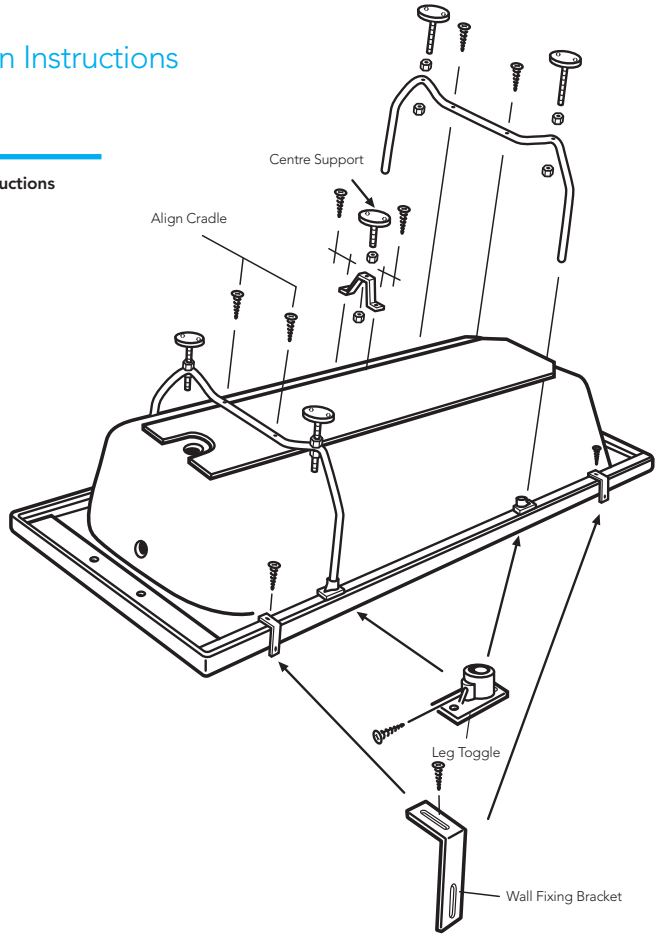
Bath
Installation Instructions

Made in UK

Bath fitting instructions



1. Remove all packaging including the polyethylene film, which covers the entire bath.
2. Check that colour match is acceptable and that there is no damage on the bath that may have occurred during transit. This can only be done if the film is removed completely.
3. Remove the two tubular cradle legs from the bath frame (keep the screws for instruction 5).
4. If required using the 23mm fixing screws attach the black housing socket to the bath frame.
5. Align the cradle and hand screw directly into the baseboard using the 32mm (1 ¼") screws from instructions 3. YOU MUST CHECK THE SCREW LENGTH – Should the bath have an 'H' frame fitted to the baseboard align and secure cradle to it. If the cradle stands proud of the baseboard it can be shortened using a hacksaw.
6. Once the cradles have been secured to the baseboard of the bath secure them into the legs toggles with the self tapping screw provided making sure the self tapping screw pierces the steel leg. This will be easier if pre-drilled with a 3.2mm bit.
7. Secure the adjustable M10 feet to the cradles using M10 nuts provided.
8. Secure the adjustable centre support using screw and nuts provided to the centre of the baseboard (or 'H' frame).
9. With the bath in the upright position set top face level using threaded adjustment of feet and lock-nuts. When a panel is to be fitted set bath height to height of panel.
10. CHECK THAT THE BATH RIM IS LEVEL.
11. Before the final fixing of the bath, fit tap and waste fittings using a suitable sealing compound. When complete place bath into position, re-check levels and make any final adjustments necessary. Finally secure the feet to the floor and the wall brackets to the wall. Movement may occur if not fitted correctly.

Bath
Installation Instructions

- Prior to fitting your bath, carefully remove all the packaging and film from the bath and examine the bath for damage and suitability of colour match.
- Check the panel fit and match prior to installation.
- Note instruction 10 before final fixing.
- Any refixing costs or claims for wrong colour match, and/or any other faults will not be accepted after fixing.

No claims for the above will be accepted once the bath is fitted
