

ANVY DIGITAL EXPERIENCES INCREASED REVENUE WITH THE SPYDERX WIDE FORMAT INKJET PRESS FROM FUJIFILM

Hanover Park, Ill., December 3, 2019 – Anvy Digital, a Calgary, Alberta Canada-based large format specialty print service provider experiences increased revenue with the Inca [SpyderX](#), a wide format UV digital inkjet flatbed printer distributed exclusively throughout North America by Fujifilm.

Founded in 2002, [Anvy Digital](#) is a leader in large format digital print in Canada, and consistently invests in innovative solutions like the SpyderX to produce the finest quality of print products for its customers. With a focus on display printing, banners, backlit and window graphics, floor graphics and adhesive vinyl, jobs are processed efficiently and quickly shipped across Canada and the U.S.

“The SpyderX allows more capacity,” said Bob Lush, vice president of sales, Anvy Digital. “We are very pleased with the quality and the speed we are able to achieve on this press. Our clients are extremely impressed with the output.”

With a robust 126” (3.2 m) width capacity, six-color plus optional white, SpyderX is available as either flatbed or a combination flatbed/roll-to-roll system for handling rigid and flexible substrates. This powerful and versatile printer is capable of producing a wide variety of output at high speeds up to 2,476 square feet per hour (230 square meters per hour). Featuring premium Fujifilm [Uvijet XK ink](#), and [FUJIFILM Dimatix printheads](#), the printer delivers high speed production with sharp, pinpoint accuracy while handling a wide range of media and applications.

“We’ve had success with the Onset Q40i flatbed press for many years, and with regard to Inca’s trusted technology, we knew the SpyderX would provide high quality and consistent output from the first sheet to the last,” says John Phan, president, Anvy Digital. “We wanted a true flatbed as a complimentary addition to our existing Onset Q40i, and the SpyderX is the perfect balance of speed and quality. The addition of white ink on the SpyderX allows us to expand capacity and applications, offering our client base many more options.”

Anvy Digital’s offerings include output for clients that include indoor and outdoor signage for retail and corporate installations, as well as decals, murals, hanging décor, short-term signage, site signage, banners, flags, and trade show marketing.

“Given our range of applications for both indoor and outdoor, from small to extremely large installations, we need versatility in our equipment,” adds Lush. “Our investment in the SpyderX allows us to meet and exceed the demands of our clients.”

“When you think big – think Anvy Digital,” concludes Phan.
