

BUNKER FUEL LABORATORY TESTING

ENSURE REGULATORY COMPLIANCE, MINIMISE RISK AND SAVE MONEY WITH OUR GLOBAL FUEL LABORATORY CAPABILITY

We combine our global port agent network with an ISO certified laboratory partner and courier network, delivering a global solution to bunker fuel laboratory testing, providing cost effective pricing via a single point of contact.

Supporting:

- ▶ Fuel Analysis – ISO 8217: 2005, 2010 & 2017 and additional parameters
- ▶ Bunker Fuels – HFO, MGO, MDO, MFO and Distillates
- ▶ Global network supporting sample collection and dispatch

The Benefits to you:

- ▶ ISO standard testing through an established global laboratory network
- ▶ IMO 2020 testing compliance
- ▶ Timely laboratory analysis
- ▶ Access to global courier network with ISO certification
- ▶ Global standardised pricing capability inclusive of courier cost
- ▶ Cost savings through our regional or global pricing options
- ▶ Global communication channel reducing risk and burden

Additionally, Inchcape is able to:

- ▶ Combine with our existing Bunker Optimisation product, providing bunker quantity survey, launch, agency and laboratory test within one combined package in key bunker locations around the world
- ▶ Deliver Forensic Bunker Audits in key bunker locations globally
- ▶ Provide Security of a trusted partner delivering the highest international standards on QHSSE and Compliance
