**Subject:** Letter of Information concerning the prevention devices against the Coronavirus at the port of Conakry

Dear Sirs,

The spread of the new Coronavirus which prevails in Wuhan (China), has taken worrying proportions (more than 3000 cases and approximately 1000 deaths). This alarming situation has led the World Health Organization to declare the state of international emergency.

In Guinea, the National Health Security Agency has reactivated the monitoring devices in the maritime borders (Port of Conakry, Kamsar, Boké and Boffa) and at the airport of Conakry-Gbéssia. At the Port of Conakry, a technical team of nine (9) doctors and public health first aiders ensures the safety of ships and travelers 24 hours a day.

Hand washing and wearing of bibs are strongly recommended when entering the ships. The Doctors who are the first to board vessels, control the origin and health of the vessels and crew members.

Please note that the technical monitoring team is under the control of a watch committee whose focal point is the Director of the Autonomous Port of Conakry, Ms. Touré Aissata Aribot.

Let us respect all these preventive measures so that the Coronavirus is far from Guinea.
