

High-speed Face Mask Making machine - Welding Part

Main Features

- We use the 15-20KHz ultrasonic welding system, it's more fast welding, environment and beautiful simple design.
- Ultrasonic machine with wear-resistant, long life and so on.
- Operation without preheating Continuous processing, fast, mass production.
- The machine is easy to operate, easy to understand, ordinary workers can operate on the machine.
- The production speed of masks is 80-100 pieces/min and above, and the pass rate is above 98%, which is higher than the similar products.

Equipment Introduction

This welding machine is mainly used for automatic forming of disposable flat masks. The servo and constant temperature control system used is controlled by PLC program to spot welding ear bands completed at one time.

Technical Parameters

Brand name	KXT
Voltage	220V
Power	2.6KW
Style	Ultrasonic Welding
Frame	Aluminium Body
Dimension(L*W*H)	2000(L)*950(W)*1550(H)mm
Warranty	1 year for mechanical components
Capacity	40-80pcs /min
After-sales	Engineers are available or 24-hour online guidance
Usage	Producing Face Masks (1-4 ply face mask)

Services

- 1) Provide 24-hour service hotline.
- 2) Reply and find out solution within the shortest time according to customer's requirement.
- 3) Provide on call service to help customer solve problems.
- 4) Provide free of machine installation as well as commissioning, and inform customer how to do the machine maintenance.
- 5) Prepare customer's feedback tracking
