FOUNDATION AND STRUCTURE

Foundation by means of isolated footings and/or a continuous reinforced concrete slab according to the conclusions of the Geotechnical Study and CTE DB-SE-C "Foundations".

Reinforced concrete structure made up of pillars, beams, straps and rib slabs cast in-situ, complying with CTE OB-SE "Structural Safety".

FACADE AND ROOF

- The façade is designed by means of a double-leaf enclosure formed by a 1/2-foot system of perforated ceramic brick on the outside, an air chamber with intermediate thermal insulation of 60-mm rigid mineral wool panel, and cladding with laminated plaster partitioning with 50 mm mineral wool acoustic insulation inside (All according to CTE DB-HE "Energy Saving" and DB-HR "Protection against noise").
- On the exterior, the walls are coated with a single-layer of mortar coating in white.
- The properties' passable terraces are designed according to their purpose, guaranteeing their watertightness through asphalt waterproofing or similar, according to CTE DB-HS "Health" and DB-SU "Safety of Use".
- Sloped roof, monolayer mortar coating in white, as well as the finishing of the façades.

MASONRY AND COATINGS

- Interior division of dwellings executed by means of laminated plaster partitioning with a metallic structure and internal acoustic insulation of 70 mm mineral wool.
- Division between dwellings will be made with perforated solid brickwork and a laminated plaster lining with 50mm mineral wool acoustic insulation on each side.
- Plaster and/or laminated plaster false ceilings in corridors, bathrooms and all necessary areas in order to hide the installations of the property (Air conditioning, Ventilation, Lighting, etc.)
- Smooth white plastic paint on vertical and horizontal walls throughout the property.

EXCLUSIVE PERSONALISATION PROGRAM.

RESERVA DEL HIGUERON PRIVE will work with you to adapt your HOME so that it is unique and tailored to your needs. That is why we have devised some HOME CUSTOMISATION and IMPROVEMENT PACK programs which, among others, include:

- FLOOR AND TILING FINISHES.
Select the flooring and tiling finishes that best suit your taste from a variety of options selected by our RHP team. As an alternative to porcelain flooring, you can choose from several wooden flooring options from the PERGO brand or similar.
- DESIGN YOUR KITCHEN.
Select the base, wall units and countertop finishes. You can also choose to upgrade the design with countertop extensions, hidden countertop sockets, integrated LED lighting and installation of a Wine cellar, among other options.
- DESIGN YOUR WARDROBES.
Select the cabinet finishes that best suit your taste among the proposals offered by our RHP team.
- IMPROVE YOUR AIR CONDITIONING.
The motorised control of the grilles allows you to improve the air conditioning system of your home by installing an Integrated Independent Temperature Control System in each room.

CHOICE & DECISION

EXCLUSIVE PERSONALISATION PROGRAM.

- HEATING OPTIONS.

You can improve your home with the different heating options:

- Electric underfloor heating in the main bathroom and toilet with a smart thermostat from PORCELANOSA or similar.
- Installation of Radiant Floor throughout the House taking advantage of the installed AEROTHERMAL SYSTEM.

- CHOOSE YOUR TOILETS.

Select the finishes of the washbasin furniture from among our team's proposals.

- SELECT YOUR INTELLIGENT HOME AUTOMATION.

You will be able to choose which intelligent home automation systems you want to install in your home, such as presence simulation, motorised control of blinds etc... among the personalisation options.

- OPTIONAL.

You have the possibility to complete your design with other additional options that our RHPrivé Team can offer.

- **OPTIONAL 1:** Zoned underfloor heating control
- **OPTIONAL 2:** Bluetooth Audio Control
- **OPTIONAL 3:** Adjustable lighting On/Off General lighting

- *** IMPORTANT NOTE:**

All finishes or elements described may be modified or replaced by elements of equal or superior quality due to technical decisions, changes in manufacturer models, technical criteria or changes in applicable regulations.

SUSTAINABILITY & ENVIRONMENT

QUALITY AND BALANCE

CARAT

QUALITY REPORT

DEL HIGUERÓN

SUSTAINABILITY AND ENVIRONMENT.

At RH Privé we have a strong commitment to the planet, hence Carat's commitment to **energy efficiency**.

Its design adapts to the surrounding climate and landscape, with a low-impact construction in order to add our small part to the Costa del Sol and contribute to transforming and improving its future.

We want to be part of the new collective consciousness that values our connection with nature, health and respect for the environment. **Eco-Lifestyle**

That is why Carat will have:

- A TREATMENT AND RECYCLING STATION

of greywater from showers and sinks that will be reused for irrigation and watering of vegetation and communal areas, as well as capturing rainwater. Thus helping to reduce energy consumption, conservation of the Mediterranean and application of the circular economy.

- WATER SOFTENER

to reduce calcium and magnesium, achieving a perfect water hardness which offers important benefits for health, hygiene and home maintenance, given that it lengthens the life-span of appliances and pipes.

- INDIVIDUAL VENTILATION SYSTEMS

with double flow CMV (Controlled Mechanical Ventilation) with heat recovery to obtain maximum energy efficiency.

- AEROTHERMAL SYSTEM

for air conditioning and production of DHW (Domestic Hot Water) offering lower energy consumption and less pollution.

- SELECTED VEGETATIONS

that have low water consumption and create different fragrant environments.

- VERTICAL GARDENS

in communal areas that contributes to improving energy performance.

- PROTECTIVE ELEMENTS AGAINST SOLAR RADIATION.

Blinds in the rear areas of the houses and Foscurit in the main bedrooms.

- LARGE WINDOWS

to make the most of the natural light, using low emissivity glass and protected by generously sized terraces that extend. The carpentry ensures that there are no thermal bridges.

- THERMAL INSULATION SYSTEM ON FAÇADES AND ROOFS

minimising energy losses as much as possible.
