The Bishopstone Space Agency Martian Robot Sensing Mission

21st October 2014

WALT (LI): **Interpret continuous data to solve a scientific enquiry**

Name: _ _ _ _ _ _ _ _ _ _ _ _

WILF: Teamwork to select a suitable material **by interpreting live light measurement data in a line graph** then recording that data in a table.

Remember that your mission is to find a material that will **protect** our robot from solar radiation (**sunlight**)

Table:

This is the amount of light that the robot detects:

Material (including a sample)	Prediction of reading (%)	Actual reading (%)	The Difference
