MATHS	Pupils will develop their mathematical skills through specific maths lessons (Please see the National Curriculum for further details). Our curriculum aims to ensure that all pupils: <ul style="list-style-type: none"> • become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately. • reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language • can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions. 		
SCIENCE	Seasonal changes: September-December Animals including humans/ Healthy me	Seasonal changes: January-April Plants Uses of everyday materials/ Materials mini-world	Seasonal changes: May- August Living things and their habitats Plants/ Young gardeners
