

27th May 2016

Science Week

Dear Parents / Carers,

On the week commencing 20th June 2016, we are hosting a

week.

There will be a variety of activities taking place through out the week involving all the classes. We have visitors coming in to lead lessons and workshops and teachers will be planning wonderful science experiments in their own classes. Richard Hale, GSK and qualified First Aiders are coming in to work with the children too.

Sports Days (weather permitting) are also on this week, so we will be looking at healthy living as one of our themes.

To 'kick off' the event, EYFS and KS1 will take part in a workshop called 'Life Long Ago' – where they will learn about dinosaurs and look at fossils. In the afternoon, we have a special visitor – Sophie the baby T-rex. She is coming into an assembly to meet all the children and will be happy to pose for some photos afterwards. (This is a life-like full body costume that is worked by a puppeteer.)

To cover the cost of all the activity resources, workshops and visitors we would like to ask you for a donation of £5.

We are really looking forward to learning about science in many different ways.

Thank you for your continued support.

Nicola Roberts
Science Leader

Science week donations

I enclose £5 donation to go towards science week activities.
